## 2 About this Documentation

This section contains some introductory information on this documentation.

## 2.1 Types of Topics

The types of topics include concepts and tasks:

Type of topic	Description
Concept	Explains the "What" and provides an overview of context and background information for specific features, etc.
Task (operating instructions)	Describes task-oriented application cases (i.e., the "How") step-by-step and assumes familiarity with the associated concepts.
	Tasks can be identified by the title <b>How</b> to

#### **Related concepts**

**Display Conventions on page 11** 

## 2.2 Display Conventions

This documentation uses a variety of methods to present different types of information.

Type of information	Presentation	Example
User Interface Elements	Bold	Click <b>OK</b> .
Menu sequence	>	File > Exit
Special emphasis	Bold	Do not delete Name.
Cross-reference text	Italics	You will find more information in the topic <i>Network</i> .
Output	Monospace font, e.g., Courier	Command not found.
Input	Monospace font, e.g., Courier	Enter LOCAL as the file name.
Key combination	Monospace font, e.g., Courier	<ctrl>+<alt>+<esc></esc></alt></ctrl>

### **Related concepts**

Types of Topics on page 11

## 3 Introduction

This document is intended for the users of myPortal for Desktop and describes its installation, configuration and operation.

## 3.1 myPortal for Desktop

myPortal for Desktop is an application for unified communications. Besides convenient dialing aids via phone directories and favorites and information on the presence status of other subscribers, the application can, for example, also used to access voicemails and fax messages.

myPortal for Desktop provides the following features:

- Directories
- · Favorites List
- Journal
- Desktop Dialer
- · Screen pops
- Presence Status
- CallMe service with ONS (One Number Service)
- · Status-based call forwarding
- · Personal AutoAttendant
- Conferences
- · Record calls
- · Recording conferences
- · Instant Messaging
- · Voice and fax messages

## 3.2 User Interface Elements

The user interface of myPortal for Desktop consists of the main window and various screen pops, depending on the situation.

# myPortal ★ Favorites Directories

**User Interface** 

The classic interface offers a large main window with the following elements:

- Menu bar (1) with:
  - Drop-down list for call numbers and the **Dial** button (**Answer** during an incoming call or Hang Up during an ongoing call).

The drop-down list contains up to ten previously dialed numbers and serves as an input field for numbers to be dialed or names to be found.

- Symbol and also drop-down list for your presence status
- Name of the logged in user
- Tabs (2)

You can enable or disable the following tabs individually, but at least one must be active:

Journal

possibly with the number of open calls next to it in parentheses

Voice Messages

possibly with the number of new voicemails next to it in parentheses

- Fax Messages

possibly with the number of new fax messages next to it in parentheses

- Directories
- Favorites list (3)
- Messages (4)
- Conference menu (5)
- Setup menu (6)
- Help menu (7)

#### Introduction

Online Help

· Workspace (8):

The information and actions available in the workspace depend on the selected tab.

With the user interface, the following elements can each be displayed in either the main window or in separate windows:

- Journal
- Voicemails
- Fax Messages
- Directories

#### **Context menus**

Context menus provide situation-based actions for selection. Context menus can be opened by clicking on the relevant object with the second (usually the right) mouse button.

#### **Tooltips**

Tooltips are tiny windows in which myPortal for Desktop displays more information on objects of the graphical user interface such as icons, input fields or buttons, for example. ... at the end of a label indicates "incomplete due to lack of space". The appropriate tool tip appears when you let the mouse pointer hover over that element for a brief period of time.

## 3.3 Online Help

The integrated online help describes key concepts and operating instructions. The online help is context-sensitive and opens the associated Help topic for each opened WBM page.

#### **Navigation**

The buttons in the online help provide the following functions:

provides you with an overview of the structure

#### Index

provides direct access to a topic using keywords

## Search

allows you to do a full-text search and selectively find all relevant topics

## 4 Installing and Starting myPortal for Desktop

The use of myPortal for Desktop is subject to specific requirements.

**NOTICE:** The PC must have Oracle Java 8 or higher or alternatively OpenJDK 8 installed. If an older version is installed, you will need to update it to Version 8 or higher before starting the installation.

## 4.1 How to Install myPortal for Desktop (Windows)

### **Prerequisites**

The administrator of your communication system has made the installation file or the link to the file available to you.

**NOTICE:** Please make sure that you refer to the notes in the ReadMe first.rtf file.

#### Step by Step

- 1) Run the CommunicationsClients.exe install file.
- 2) If the User Account Control window appears with the message An unidentified program wants access to your computer, click Allow.
- Enter the IP address or DNS name (hostname) provided by your administrator and click Next.
- **4)** After validation of IP address, the installer will check if .NET 4.5 is available and install it if not.
- 5) Click on myPortal for Desktop to mark it for installation.

Clicking on an application will cycle between actions:

Symbol	Function
	Install
	Repair
	Remove

- 6) If you want, change the installation folder in the Install To: field.
- 7) Click Install.
- 8) Follow the instructions of the installation program.

#### Related tasks

How to Start myPortal for Desktop on page 17
How to Uninstall myPortal for Desktop (Windows) on page 19
How to Uninstall myPortal for Desktop (Mac OS) on page 20

## 4.2 How to Install myPortal for Desktop (Mac OS)

#### **Prerequisites**

The administrator of your communication system has made the installation file or the link to the file available to you.

**NOTICE:** Please make sure that you refer to the notes in the ReadMe first.rtf file.

#### Step by Step

- 1) Run myPortal.dmg.
- 2) Click in Finder on Devices > myPortal.
- 3) Keep the Ctrl key pressed and click on myPortal Installer.
- 4) Select Open in the context menu.
- 5) Click on Continue.
- 6) Click on Open.
- 7) Click on Install.
- 8) Click on Close.

The login screen of myPortal for Desktop appears.

#### **Next steps**

Start myPortal for Desktop

#### Related tasks

How to Start myPortal for Desktop on page 17 How to Uninstall myPortal for Desktop (Windows) on page 19 How to Uninstall myPortal for Desktop (Mac OS) on page 20

## 4.3 How to Start myPortal for Desktop

#### **Prerequisites**

myPortal for Desktop is installed on your PC.

If you are working under a Mac OS: the secondary mouse button is activated (to use context menus).

#### Step by Step

- 1) Select one of the following options:
  - Mac OS: click on Programs > myPortal.
  - Windows: Click on Start > Communication Clients > myPortal.

**NOTICE:** The concurrent usage of myPortal for Desktop with myPortal for Outlook under the same user name is not supported.

The concurrent usage of myPortal for Desktop with myAgent under the same user name can lead to restrictions (see myAgent, User Guide Notes on Using Clients Concurrently).

- 2) Enter your call number in the **User Name** field of the Login window.
- **3)** Enter your **Password**. The default password when logging on for the first time is 1234. Otherwise, contact the administrator of your communication system.

**INFO:** When you start a PC client for the first time, you will be prompted to change your password, provided you have not already changed it via the phone menu of the voicemail box.

Enter your previous password in the **Old password** field.

Enter your new password, which must consist of only digits and include at least six digits, in the **New password** and **Confirm password** fields.

The maximum number of repeated characters is two and the maximum number of sequential characters is three.

The account name (reversed or not) cannot be part of the password.

The password applies to myPortal for Desktop, myPortal for Outlook, Fax Printer, myAgent, myReports and myAttendant as well as phone access to your voicemail box.

**NOTICE:** If the wrong password is entered five times, your access to all clients will be locked. Unlocking is only possible by the administrator of your communication system.

4) If you want to use myPortal for Desktop with an automatic login in the future, enable the check box Save Password. The Login window will then no longer be displayed. You can change this option at any time.

**NOTICE:** You should use the automatic login only if you are certain that no-one else has access to your user account. Otherwise, unauthorized users could, for example, potentially access your voicemails and fax messages or redirect your station number to external toll-based destinations.

**5)** If you are also a user of myAttendant, disable the **myAttendant** checkbox.

- **6)** If the **Server IP** is displayed, enter the IP address or DNS name (hostname) of the communication system or UC server in that field.
- 7) You can select your preferred language by clicking on the current preferred language at the bottom left side of the Welcome to myPortal window.
  A drop-down list with all the available languages appears.
- 8) Click Login.

## 4.4 How to Exit myPortal for Desktop

On 64-bit Microsoft Windows operating systems, it may be necessary to manually close myPortal for Desktop before shutting down the PC.

#### Step by Step

- 1) Click on the Close icon in the title bar of the myPortal for Desktop window.
- 2) Click on OK.

## 4.5 How to Uninstall myPortal for Desktop (Windows)

#### **Prerequisites**

myAttendant is also no longer required.

#### Step by Step

1) Close myPortal for Desktop.

**NOTICE:** Please make sure that you refer to the notes in the ReadMe first.rtf file.

- 2) Select one of the following options:
  - · Windows 8:

Click in the Control Panel on Programs.

Windows 10:

Click in the Control Panel on Programs.

Windows 11:

Click in the Control Panel on Programs.

Click on Change in the context menu of the Communications Clients entry.
 The Communications Clients Installer window appears.

How to Uninstall myPortal for Desktop (Mac OS)

- Click on myPortal for Desktop entry until the symbols appears on the side of this entry.
- 5) Click on **Remove** to uninstall myPortal for Desktop.

#### Related tasks

## 4.7 Automatic Updates

Automatic updates ensure that the UC clients are always kept up-to-date with the latest version.

If a new version is available, the update will either be installed automatically or you will be notified that an update is available. If necessary, a message is displayed indicating that one or more applications must be closed to perform the update.

**NOTICE**: We recommend that you always perform the updates offered. This also applies to software that is required for certain UC clients.

## 4.7.1 How to Perform Automatic Updates (Windows)

## **Prerequisites**

You have received a message such as: Client update available. Please wait while the update is done. Please close the following programs to continue the update: [...].

#### Step by Step

Close the named programs.

## **Next steps**

Restart myPortal for Desktop after the automatic update.

## 4.7.2 How to Perform Automatic Updates (MAC OS)

## **Prerequisites**

You have received a message about a pending update.

Step by Step

Click OK.

### **Next steps**

myPortal for Desktop restarts after the automatic update.

## 5 First Steps

The First Steps describe the recommended actions to be taken right at the beginning.

#### Change the password

**NOTICE:** For security reasons, you should change your password after logging in for the first time. Otherwise, unauthorized users could, for example, potentially access your voicemails and fax messages or redirect your station number to external toll-based destinations by simply using the default password.

#### Select the language settings

Select the respective language for:

- the user interface of myPortal for Desktop
- the menu and internal system announcements.

#### Record your name announcement

Your name announcement is used as an independent component of the announcements played back by the communication system:

- when your voicemail box notifies callers about your Presence status
- for conferences where you are the inviter, as a greeting to the participants:
  - "... has invited you to participate in a conference"
- for conferences, to inform participants that you have joined:
  - "... has joined the conference."

#### Record your personal greeting

Your personal greeting is played back to callers by default when they reach your voicemail box. For example: "I am unfortunately unable to take your call at the moment ...". The following announcements are possible as personal greetings:

- · general personal greeting
- Personal greeting for Busy:
- Personal greeting for No Answer:

**NOTICE:** You can record further announcements; see Voicemail Box on page 105.

#### Specify your email address

Enter your email address so that the communication system can invite you to conferences by email and notify you about new voice and Fax messages.

#### **Create your Favorites list**

Your Favorites list will provide you with a constant view of your most important contacts and enable you to call them with one click.

#### Importing Outlook Contacts into myPortal for Desktop (Windows)

You can have your Outlook contacts imported into the personal directory of myPortal for Desktop automatically on starting. You can then call them conveniently by using myPortal for Desktop, for example.

## 5.1 How to Select the User Interface Language

### Step by Step

- 1) Click on Setup.
- 2) Click on My Preferences > Appearance.
- 3) Select the Language from the drop-down list.
- 4) Click Save.

#### **Next steps**

Exit myPortal for Desktop and restart the application.

## 5.2 How to Select the Language of the Voicemail Box

## Step by Step

- 1) Click on Setup.
- 2) Click on Communications > VoiceMail Settings.
- 3) Select the desired language from the VoiceMail Language drop-down list.
- 4) Click Save.

## 5.3 How to Record your Name Announcement

**NOTICE:** You can also record your name announcement via the Phone menu of the voicemail box.

#### Step by Step

- 1) Click Setup.
- 2) Click VoiceMail Profiles and then on any profile.

The available profiles are: **Busy**, **No Answer**, **Meeting**, **Sick**, **Break**, **Out of Office**, **Holiday**, **Lunch**, **Home**.

- 3) Click Record.
- 4) Click on My VoiceMail Name in the list of announcements.
- 5) Click **Record**. The voicemail box will now call you on your phone.
- 6) Accept the call from the voicemail box.
- 7) Speak out your name after the tone.
- 8) Click Stop.

- If you want to listen to the announcement on the phone, click on **Play**. To exit the playback loop, click on **Stop**.
- 10) If you want to record the announcement again, click on Record again.
- 11) Click on Close, followed by Save.

## 5.7 How to Enable the Import of Outlook or Mac OS Contacts at Startup

#### **Prerequisites**

You are working under Windows.

#### Step by Step

- 1) Click on Setup.
- 2) Click on My Preferences > Outlook Connectivity.
- 3) Enable the Import Outlook Contacts on Startup check box.
- 4) Click Save.

## **6 Unified Communications**

Unified Communications is a generic term that refers to the integration of different communication systems, media, devices and applications within an environment (e.g., telephony, presence, voicemail and instant messaging).

#### 6.1 Presence Status and CallMe Service

The Presence status and CallMe service display and optimize the availability of subscribers. The Presence status enables simple status-based call forwarding as well as rule-based call forwarding, which can be flexibly configured with myPortal for Desktop or myPortal for Outlook.

### 6.1.1 Presence Status

The Presence status indicates the availability of internal subscribers (including mobile subscribers) in the Favorites list, the internal directory, the virtual conference room and via voicemail announcements. In addition, the Presence status controls the availability of internal subscribers with status-based call forwarding, rule-based call forwarding and the personal AutoAttendant.

**NOTICE:** MyPortal to go is not managed by VSL. Therefore, the present status will always be shown offline.

You can change your Presence status in myPortal for Desktop and also in the Phone menu of the voicemail box. Deactivating call forwarding at the telephone returns you to the **Office** presence status. For every change in the Presence status (except for **Office** and **CallMe**), you also define the scheduled time of your return to the **Office** or **CallMe** status.

The drop-down list for the Presence status includes the following symbols:

Symbol	Presence status	Availability
_	Office	Available at the normal workplace
_	Only selectable if the CallMe service is not active Otherwise, <b>CallMe</b> appears here.	
<b>A</b> E	CallMe	Available at an alternative workplace
•	Only selectable if the CallMe service is active Otherwise, <b>Office</b> appears here.	
<b>A</b>	Meeting	absent - Redirected to voicemail or status-based call forwarding to another phone number

Symbol	Presence status	Availability
+	Sick	absent - Redirected to voicemail or status-based call forwarding to another phone number
C	Break	absent - Redirected to voicemail or status-based call forwarding to another phone number
2	Out of Office	absent - Redirected to voicemail or status-based call forwarding to another phone number
<del>\</del>	Holiday	absent - Redirected to voicemail or status-based call forwarding to another phone number
Ψ1	Lunch	absent - Redirected to voicemail or status-based call forwarding to another phone number
n	Home	absent - Redirected to voicemail or status-based call forwarding to another phone number
•	Do Not Disturb	absent - Redirected to voicemail or status-based call forwarding to another phone number

**NOTICE:** The "sick" presence status may not be available, depending on system settings by the administrator.

**CallMe** is shown in the Favorites list and in the internal directory as **Office**. The following additional symbols are available there:

Symbol	Presence or connection status
<b>.</b>	Subscriber receives a call
6	Subscriber is calling
6	The subscriber is on the phone
8	Presence status is not visible
ď.	Phone is not connected

**NOTICE:** For subscribers without system telephones (e.g., ISDN or analog), the Favorites list and the internal directory do not indicate any presence, but only the connection status.

#### Call Forwarding to the Voicemail Box

If your Presence status is not **Office** or **CallMe**, the communication system redirects your incoming calls to the configured forwarding destination (by default, your voicemail box) and notifies the callers via status-based announcements about the nature of your absence and the scheduled time for your return.

#### Info Text

You can enter any info text for your current presence status, e.g., "I am in Room No. ..." when attending a meeting. The info text is displayed in the Favorites list, in the internal directory and in the virtual conference room. The info text is deleted when you change your presence status.

#### **Automatic Reset of the Presence Status**

You can have your Presence status automatically reset to **Office** at the end of your scheduled absence. Otherwise, the communication system extends the current Presence status in increments of 15 minutes until you change it yourself.

#### Visibility of your Presence Status

For each subscriber in the internal directory, you can specify whether that subscriber can see your Presence status other than **Office** and **CallMe** as well as the scheduled time of your return and any info text you may have entered.

#### Automatic Update of Presence Status via Outlook / iCal Appointments

You can automatically control your Presence status via appointments (but not for those that have been proposed or declined) by using specific keywords in the Subject line. You can choose between the following calendars:

Exchange calendar (on the Exchange Server)

The automatic update of the presence status via Outlook appointments occurs independently, regardless of whether or not your PC is running. The administrator must configure the Exchange Calendar Integration for this function.

· Outlook calendar

The automatic update of the presence status via Outlook appointments requires myPortal for Desktop to have been started on your PC.

· iCal calendar

You can use the following keywords:

- Meeting
- Sick
- Break
- Out of Office
- Holiday
- Lunch
- Gone Home

**NOTICE:** If the administrator has disabled "sick" presence status, then the presence status is not updated automatically when you use the sick keyword.

The keywords depend on the language set for the user interface. The keywords may be located anywhere in the Subject line. If the Subject line contains more than one such keyword, only the fist takes effect. When this function is enabled, your Presence status changes automatically at the start and end time of the relevant appointment. The check for calendar appointments occurs at 30-second intervals.

**NOTICE:** When enabling this function, please bear in mind that any appointments with these keywords in the Subject line could lead to undesirable changes in your Presence status. Consequently, you may nee to change the Subject line if needed.

#### **Automatic Creation of Outlook Appointments when Absent)**

You can have appropriate Outlook appointments created automatically when you are absent by a change in your Presence status. The Subject line of the corresponding Outlook appointment consists of your Presence status and the text "(Auto)", for example: "Meeting (Auto)". The start and end times for the appointment involved correspond to your entries in myPortal for Desktop. The end time of the Outlook appointment remains unchanged in the event of a possibly delayed return. The Outlook appointments are created in your local pst file, regardless of whether or not your Outlook is open.

#### Screen Pops on Changing the Presence Status

You can have changes to your Presence status indicated by a screen pop.

### 6.1.2 CallMe Service

The CallMe service can be used to define any phone at an alternative workplace as the CallMe destination at which you can be reached through your own internal phone number. You can use the UC client at your alternative workplace exactly as in the office and thus also make outgoing calls from the CallMe destination.

#### **Inbound Calls**

Calls to your internal number are redirected to the CallMe destination. Your internal phone number is displayed to the caller. Unanswered calls are forwarded to the voicemail box after 60 seconds.

#### **Outbound Calls**

When you dial a number in the UC client, the communication system first calls you at the CallMe destination. If you answer the call, the communication system then calls the desired destination and connects you with it. Your internal phone number is displayed at the destination (One Number Service).

#### **Presence Status**

When the CallMe service is enabled, the message "CallMe active" appears in the display of your phone (not for analog and DECT phones). Other subscribers will see your presence status as **Office**.

#### Activation

You can activate the CallMe service manually. In addition, the CallMe service is also reactivated by an automatic reset of the Presence status following an absence, provided it was active earlier. Then following types of CallMe destinations are not supported:

- Group
- · Redirected telephone

#### Deactivation

The CallMe service remains active until your Presence status changes.

**NOTICE:** CallMe function should not be used when dialing or calling in an open conference.

#### Related concepts

Presence Status on page 26

#### 6.1.2.1 How to Enable the CallMe Service

#### Step by Step

- 1) Select Office in the drop-down list for the Presence status.
- 2) Click on the option Enable CallMe service.
- **3)** Set the call number of the CallMe destination by one of the following methods:
  - · Select one of your additional call numbers from the drop-down list.
  - Enter a phone number in dialable format or in canonical format in the drop-down list.

**NOTICE:** Do not enter a group or a redirected phone as the CallMe destination.

4) Click OK.

#### Related concepts

How to Define an Additional Phone Number on page 136

## 6.1.3 Status-based Call Forwarding

Status-based call forwarding enables you to forward calls based on your Presence status to one of your additional phone numbers or your voicemail box.

You can configure status-based call forwarding for every Presence status except **Office**, **CallMe** and **Do Not Disturb**. When you change your Presence status, the communication system activates call forwarding to the destination defined by you for this purpose. For example, if you are away from the office, to your mobile phone or if you are on vacation, to your representative.

#### Related concepts

Presence Status on page 26
Rule-Based Call Forwarding on page 35

#### Related tasks

How to Define an Additional Phone Number on page 136

## 6.1.3.1 How to Configure Status-based Call Forwarding

#### **Prerequisites**

You have configured at least one additional phone number.

#### Step by Step

- 1) Click on Setup.
- 2) Click on Call Rules > Forwarding Destinations.
- Choose one of the following destinations from the drop-down list in the row with the appropriate Presence status: None, Mobile, Assistant, External 1, External 2, Home or Voicemail.
- 4) Click Save.

## 6.1.4 Rule-Based Call Forwarding

Rules-based call forwarding enables you to forward calls based on numerous conditions and exceptions even more flexibly than with status-based call forwarding, e.g., to forward calls from unknown contacts to your voicemail box.

In addition, rule-based call forwarding also supports:

- · Any destinations
- Presence status Office, CallMe and Do Not Disturb

You can define rules are activate or deactivate them at any time by using the Rules wizard. A rule can only be active if your phone has not been forwarded. Status-based call forwarding (except to the voicemail box) overrides rule-based call forwarding.

When a call forwarding rule is active, **"rule active"** appears on the display of your telephone.

When an inbound call is received, the communication system checks the applicability of the active rule in accordance with its sequential order in the Rules wizard. Only the first applicable rule is executed. In this case, your phone will ring once, and the communication system will then forward your call to the defined destination.

You can define several types of conditions and exceptions (except when ...) in one rule. However, you cannot define a condition with an exception of the same

type. For example, it is not possible to define a condition of the type "On certain weekdays" together with an exception of the type "Except on certain weekdays".

#### **Types of Conditions and Exceptions**

- (except) for certain Presence status
- (except) from certain people (in the internal directory, external directory, personal directory or from any station number)
- (except) when transferred to you from certain people (in the internal directory, external directory, personal directory or from any station number)
- (except) from a certain type, i.e., internal, external or Unknown Contact
- (except) on a certain date (also on multiple dates)
- · (except) on certain weekdays
- (except) between a certain Start and End date
- · (except) between a certain Start and End time

## 6.2 Directories and Journal

Directories, the Favorites List and the Journal organize contacts and calls.

# 6.2.1 Directories

Directories organize your contacts.

myPortal for Desktop provides the following directories, which support the functions shown below:

# **Unified Communications**

Symbol	Directory	Make Call	Look up caller names	Send Instant Message	Add to Favorites	Add to Conference
	Personal directory	X	X	-	x	x
	You can use the personal directory to either add, edit and delete your personal contacts individually or, when using Windows, to import your Outlook contacts on starting myPortal for Desktop. If you import the Outlook contacts, you cannot edit them in myPortal for Desktop.					
i	Internal directory (symbol for system phones in accordance with current Presence status)	X	X	X	X	X
	Contains:					
	<ul> <li>Users, specifically internal subscribers and MULAP groups for which the display is activated in the system with their Presence status (only system telephones). When a subscriber is absent, you can see the scheduled time of return in the Date / Time column, provided that subscriber has allowed his or her Presence status to be visible to you. Any info text that may have been entered by the subscriber are also displayed.</li> <li>Virtual Users, marked with the icon A.</li> <li>Groups, marked with the icon A.</li> <li>UCD Groups, which mean groups of agents (subscribers) that can be reached at a single phone number. They are marked with the icon A.</li> </ul>					
	By default, the Internal Directory shows only <b>Users</b> . You can filter the Internal Directory to show <b>Users</b> , <b>Virtual Users</b> , <b>Groups</b> or <b>UCD groups</b> by activating the corresponding checkbox.					
	External directory  Contains contacts that are created or imported by the administrator of the communication system.	X	х	-	X	X

Symbo	l Directory	Make Call	Look up caller names	Send Instant Message	Add to Favorites	Add to Conference
Fo	External offline directory (LDAP and Exchange)	X	X	-	X	Х
	Contains contacts from the LDAP corporate directory and must be configured by the administrator of the communication system. The external offline directory is used for the search and name resolution.					
<i>=</i> J	Speed Dials  Contains frequently needed external phone numbers. Every number is represented by a speed-dial number which is used instead of the full phone number.	x	х	-	-	-

**NOTICE:** Phone numbers stored in user settings and directories should be entered in canonical format in order to be reachable both from UC and device.

Access code should not be in the number.

**NOTICE:** When adding or removing a UC contact, it may take several minutes (**and** up to 30') until changes are applied on all clients and devices due to caching mechanisms that are used. Alternatively a system restart can be performed for the changes to take **immediate** effect.

### **Contact Details**

Depending on the directory involved, the List view of contacts in the classic interface shows different details from among those listed below: Extension, Date / Time, Last Name, First Name, Mobile Ph., Assistant Ph., External, Home Ph. 1, Business Ph. 1, Business Ph. 2, Fax Ph., Email, Department, Site, Company and Customer ID.

#### Simple Search

You can search the directories by **First Name**, **Last Name** or a call number. The directories are searched in the order shown in the table above. The search can be conducted using whole words and also with partial search terms such as a part of a station number, for example. The set search options remain in effect for subsequent searches. All search terms used are saved. You can optionally delete the list of search terms used.

#### **Advanced Search**

You can selectively search in the **Title**, **First Name**, **Last Name**, **Company**, **Extension**, **Company Ph.**, **Business Ph. 1**, **Business Ph. 2**, **Home Ph. 1**,

**Home Ph. 2**, **Mobile Number** and **Email** fields and limit the maximum number of hits.

#### Sorting

You can sort the contacts of a directory by any column in ascending or descending alphanumeric order. The direction in which the triangle at a column header is pointing indicates the ascending or descending order.

### Zooming in on an Entry

You can zoom in on a specific entry one character at a time in the column by which the entries are sorted. For example, you could jump to the first Last Name starting with "Sen" one letter at a time. This method can also be used in the results of a search.

How to Add a Contact to the Favorites List on page 49

How to Add Contacts from the Journal to the Personal Directory on page 56

How to Add Conference Participants on page 74

### 6.2.1.1 How to Search in Directories

### Step by Step

- 1) Click on the **Directories** tab or in the corresponding window.
- 2) Click on Search to open the Search view.
- 3) If necessary, click on \equiv to display the Search options.
- 4) Select the directories you want to search in.
  - If you don't select at least one directory to search in, then no search results will be displayed.
- 5) If you have selected the Internal Directory, you can select one or more of the following filter options:
  - Users
  - · Virtual Users
  - Groups
  - UCD Groups

The option **Users** is selected by default.

- 6) Select one of the following Search options:
  - If you want to search for a full word, enable the Match Full Word check box.

**NOTICE:** When **Match Full Word** is enabled, the search term must not contain any space character.

 If you want to search for a part of a word, clear the Match Full Word check box.

**NOTICE:** Search terms with spaces only apply to **first name** and **surname**.

- 7) If necessary, click on 🌣 to switch between simple and advanced searches.
- 8) Select one of the following options:
  - If you want to perform a simple search, enter a search term in the Search field. You must enter at least three characters. If your search returns a result, myPortal for Desktop will display a hit list.

#### NOTICE:

The last search results are kept if you clear the directory search filter or have less then 3 characters in the **Search** field (selecting different **search options** in this case has no effect because no search is performed by myPortal for Desktop).

If you switch to a different view like External Directory, Internal Directory or Personal Directory the search field is cleared.

- If you want to perform an advanced search, click on term in the appropriate field and click **Search**. If your search returns a result, myPortal for Desktop will display a hit list.
- 9) To abort an ongoing search, click **Stop**.
- 10) To delete the list of search terms used, click  $\widehat{\mathbb{U}}$ .
- 11) To return from the hit list to the directory, click on the desired directory.

**NOTICE:** You can also perform a filtering/search from the External Directory, Internal Directory or Personal Directory view by entering the search term in the search field.

# 6.2.1.3 How to Filter the Internal Directory

You can filter the Internal Directory to show only Users, Virtual Users, Groups or UCD groups.

### Step by Step

- 1) Click on the **Directories** tab or in the corresponding window.
- 2) Click on Internal Directory.
- 3) Click on the cog icon at the bottom of the window to display the filter options.
- 4) Select one or more of the following:
  - Users
  - Virtual Users
  - Groups
  - UCD Groups

The option Users is selected by default.

The directory is updated to match your selection.

## 6.2.1.4 How to Perform a Quick Search by Name

#### Step by Step

Enter a name as the search term in the **Dial / Search** drop-down list and press the Enter key.

## 6.2.1.5 How to Zoom in on an Entry

### **Prerequisites**

The list is sorted by the column containing an item that you want to zoom in on.

## Step by Step

- 1) Click on any item in the list.
- 2) Enter the first character of the desired hit.

# 6.2.1.10 How to Export a Personal Directory

You can export your personal directory including all contact details in a .CSV file with ";" as field delimiter.

**IMPORTANT:** The **Export** functionality includes only System contacts. Imported Outlook contacts, that are showing under **Personal Directory** view, are not included in the exported CSV file.

## Step by Step

- 1) Click on the Directories tab.
- 2) Click on Personal Directory.
- 3) Click
- 4) Select the directory in which the CSV file will be stored and click Save.

# 6.2.1.11 How to Import a Personal Directory

You can import a CSV or XML file into myPortal for Desktop. The imported contact details will be displayed in the personal directory. You can later edit the imported contacts details.

#### **Prerequisites**

You have exported the existing personal directory by clicking on **Export** under **Directories> Personal Directories** and saving the exported file.

You have included the contact details in the exported personal directory at the existing format, with ";" as field delimiter. The import file must have a header row that includes the titles of each column.

**NOTICE:** The import will overwite the existing contacts in the personal directory.

#### Step by Step

- 1) Click on the Directories tab.
- 2) Click on Personal Directory.
- 3) Click <u>↓</u>
- 4) Select the CSV file including your personal directory and click Open.

The personal directory is uploaded to the system.

## 6.2.1.12 How to Pop out the Directories Tab

The Directories tab can pop out of the main window of myPortal for Desktop.

# Step by Step

- 1) Click on the **Directories** tab or in the corresponding window.
- 2) Click on under the Directories tab.
- 3) Click on the Pop out View option.

The **Directories** pop up window appears.

**4)** If you want the **Directories** window to pop in the main window of myPortal for Desktop, you just close the **Directories** window.

# 6.2.2 Favorites List

The Favorites list provides you with a constant view of selected contacts. These contacts can also be called very easily directly from the Favorites list. All internal subscribers with system telephones are shown together with their Presence status and can be contacted via instant messaging.

You can add contacts from all directories to the Favorites list. For favorites that do not come from the internal directory, instead of the symbol for the Presence status, the symbol for the source of the contact is displayed.

The administrator has the option to assign Favorite groups to your profile. You can add or remove contacts from these groups, if it is enabled by the administrator.

The Favorites list manages contacts in groups. The contacts in all groups can be sorted by First Name, Last Name or their original sorting order.

When an internal subscriber is absent, you can determine the scheduled time of his or her return by positioning the mouse pointer over the entry for that subscriber, provided the subscriber has allowed his or her Presence status to be visible to you.

For favorites with multiple phone numbers, you can specify a default number with which the contact is to be called. The default phone number of a favorite can be determined in the context menu from the symbol with the activated check box.

For each entry in the Favorites list, the user interface additionally displays the image and info text on the presence status of the user in the overview, to the extent that this is available. The Details view includes, among other things, the standard phone number and context-sensitive buttons, e.g., for Make Call, Take Call, Send Instant Message and Add to Conference.

**NOTICE:** The chat, mail, and call icons do not appear on the bottom of the favorites list when scrolling is needed. Right mouse click on the last contact of favorites list can be used as a workaround solution.

## 6.2.2.9 How to Enable or Disable Automatic Hiding of the Favorites List

#### **Prerequisites**

If you are working under a Mac OS: System Preferences > Accessibility > Enable Access for Assistive Devices is enabled.

Automatic hiding of the Favorites list should not be enabled on a Citrix client, since the client UI will otherwise also be hidden.

### Step by Step

- 1) Click on the **Setup** symbol.
- 2) Click on My Preferences > Appearance.
- 3) Select one of the following options in the Favorites drop-down list:
  - If you want the Favorites list to be displayed at the edge of the screen and automatically hidden, select Hide to the left or Hide to the right.
  - If you do want the Favorites list to be displayed in the main window of myPortal, select **Do not hide**.

4) Click on Save.

## 6.2.2.10 How to Pop out the Favorites List Tab

The Favorites list tab can pop out of the main window of myPortal for Desktop.

#### Step by Step

- 1) Click on under the Favorites tab.
- **2)** Click on the **Pop out Favorites** option. The **Favorites** pop up window appears.
- If you want the Favorites window to pop in the main window of myPortal for Desktop, you just close the Favorites window.

## 6.2.3 Journal

The Journal is the list of all your inbound and outbound calls. You can use it to quickly and easily call your contacts again or to respond to missed calls.

### Folder for Call Types

The calls are arranged on the following tabs:

Open

Contains the unanswered missed calls for which a call number was transmitted. As soon as you answer one of these calls, all associated entries with that call number are dropped from the list.

**NOTICE:** If call is ringing on user device before the call is deflected to 3rd party then there will be an open call entry. If the call is deflected before reaching user device then there will not be an open call entry.

- All calls
- Missed
  - Outgoing (Rightwards Arrow)
  - Incoming (Leftwards Arrow)

**NOTICE:** If you want to be notified about missed calls via screen pops, disable the "close tray pop on call termination" function.

- Answered
- Internal
- External
- Inbound
- Outbound

On starting the user interface of myPortal for Desktop, only 100 journal entries are loaded. After that and when new calls come in, the number in call history will exceed 100 records.

### Grouped by time period

The calls in all folders are grouped by the same criterion, as selected by you:

- Date (for example, Today, Yesterday, etc., Last Week, Two Weeks Ago, Three Weeks Ago, Last Month and Older)
- Phone number
- Last Name, First Name
- · First Name, Last Name
- Company

The number of Journal entries contained in the group is displayed on the right of the group designation in parentheses.

#### **Call Details**

Every call is shown with the date and time and, if available, with the **call number**. If a directory contains further details on the call number such as the **Last Name**, **First Name** and **Company**, then this information is also shown. In addition, the **Direction**, **Duration**, **Domain**, **Call Info** and **Call Complete** columns are also displayed in most folders.

**NOTICE:** Call complete function is not fully supported while a group is involved.

Direction	Meaning
2	Inbound
G	Outbound

Call Complete	Meaning
<b>y</b>	The call was successful or was answered.

**NOTICE: Call Complete** column is not displayed, if the system administrator has enabled the **Disable conversation tracking** option.

### Sorting

You can sort the calls in the Journal by any column in ascending or descending alphanumeric order. The direction in which the triangle at a column header is pointing indicates the ascending or descending order.

### Zooming in on an entry

You can zoom in on a specific entry one character at a time in the column by which the entries are sorted. For example, you could jump to the first Last Name starting with "Sen" one letter at a time. This method can also be used in the results of a search.

#### **Retention Period**

The communication system saves a record of the calls in the Journal for a maximum period of time, which can be configured by the administrator. As a subscriber, you can reduce this time. After the retention period expires, the communication system automatically deletes all associated entries.

## **Export**

You can export the log data for the current day manually or automatically to a CSV file. The storage location of the CSV file can be freely selected. Once a manual export is completed, a window appears with a link to the generated CSV file containing the exported journal data.

The automatic export is performed:

- on exiting myPortal for Outlook
- · at midnight, provided myPortal for Outlook is active

The file is named according to the scheme <phone number>-<yyyymmdd>.csv. If the file already exists, it will be overwritten. The file contains the journal data of all call types except **Open** in the following fields: **Start Date**, **Start Time**, **End Date**, **End Time**, **From**, **To**, **First Name**, **Last Name**, **Company**, **Direction**, **Duration**, **Status**, **Domain** and **Call Info**.

- 6) Click on Save.

# **6.2.3.7 How to Export the Journal Manually**

# **Prerequisites**

You have specified a storage location for the journal data to be exported.

### Step by Step

- 1) Click on the **Journal** tab or in the corresponding window.
- 2) Click on Export.

Once a export is completed, a window appears with a link to the generated CSV file containing the exported journal data.

3) Click on OK to close the window.

### 6.2.3.8 How to send a Caller Notice from Journal

You can send an email to a subscriber to forward the data of the contact to a subscriber.

### Step by Step

- 1) Click on the Journal tab
- 2) Locate the journal entry from the user you want to forward the data and right click on the entry.
- 3) Click on Callback required option.

The contact data of the caller is transferred to the email text. The email recipient (To...:) field is not prefilled.

## 6.2.3.9 How to mark a conversation as completed

A conversation is a series of unanswered calls to and from a contact.

A conversation is only valid for a number of days. This number of days is configured by the administrator. After that period of time, a new conversation is opened for the contact in case of a missed call. You can mark manually all journal entries of a conversation as completed.

## Step by Step

- 1) Click on the Journal tab.
- 2) Locate the journal entry from the user you want to mark as completed and right click on the entry.
- 3) Click on Close Conversation option.

All journal entries of the conversation with the user are marked as completed.

**NOTICE:** The **Close Conversation** option will not be available, if the system administrator has enabled the **Disable conversation tracking** in WBM.

Calls

# 6.2.3.10 How to Pop out the Journals Tab

The Journals tab can pop out of the main window of myPortal for Desktop.

#### Step by Step

- 1) Click on the Journals tab or in the corresponding window.
- 2) Click on under the Journals tab.
- Click on the Pop out View option.The Journals pop up window appears.
- **4)** If you want the **Journals** window to pop in the main window of myPortal for Desktop, you just close the **Journals** window.

# 6.3 Calls

For calls, convenient features such as a desktop dialer, screen pops and the option to record calls and conferences are available to subscribers.

## 6.3.1 Call Number Formats

Call numbers can be specified in different formats.

Format	Description	Example		
Canonical	Begins with + and always includes the country code, area code and the full remaining station number. Blanks and the special characters + ()[]/-:; are allowed.	+49 (89) 7007-98765		
Dialable	Exactly as you would dial the call number on the system telephone in your office, always with the trunk access code. Blanks and the special characters + ()[]/-:; are allowed.	<ul> <li>321 (internal)</li> <li>0700798765 (own local network)</li> <li>0089700798765 (external local network)</li> <li>0004989700798765 (international)</li> </ul>		

**INFO:** If possible, you should always use the canonical call number format. This ensures that a phone number is always complete, unique and consistent for networking and mobile stations in every situation.

When dialing an external station (dialable format) manually, the CO access code must always be dialed as well. The CO access code must likewise also be specified when manually entering the destination number (dialable format) for the CallMe service (UC Suite) in UC clients.

When dialing an external phone number in dialable format from a directory (and when using the Desktop Dialer and Clipboard Dialer for certain UC clients), the communication system automatically adds the CO access code (route 1). The automatic addition of the CO access code also occurs when you select a phone number of your own personal data (**Mobile number**, **Private Number**, etc.) as a destination number for the CallMe service (UC Suite).

**NOTICE:** For calls within the USA via CSTA to a number in canonical format, phone numbers are converted to the dialable format.

# 6.3.3 Desktop Dialer

Using the Desktop Dialing function, you can call a selected destination from many applications such as an editor or an Outlook e-mail.

You can use either clipboard dialing, or desktop dialing. Both methods dial the number which is selected but the handling regarding the tagging of the number is different. Clipboard dialing is the preferred method.

Depending on the type of string used, the Dialer works as follows:

- · A phone number in canonical format is dialed directly.
- A station number in dialable format is dialed directly if the communication system can decide whether an internal or external destination is involved. Otherwise, the user is asked to make the appropriate selection.
- A string which contains letters or special characters that are not allowed in canonical and dialable format, is searched in the directories as a first name or last name.

The tagged number is dialed after a specified time period. Within this time period, you can still cancel the dialing. If you change the default value of 3s to 0s, the dialing will occur immediately. Over the time more and more applications have become technically incompatible with the Desktop Dialing method. If the Desktop Dialing method does not work any longer e.g. after an update of the operating system and/or application the Clipboard Dialing method has to be used instead.

**NOTICE:** The Desktop Dialing method is not supported by Apple Mac OS in general. In this case Clipboard dialing has to be used.

#### **Related concepts**

Call Number Formats on page 58
Call Functions on page 59

## 6.3.3.1 How to Make a Call via the Clipboard or Desktop Dialer

## **Prerequisites**

If you are working under a Mac OS: System Preferences > Accessibility > Enable Access for Assistive Devices is enabled.

### Step by Step

If the string is a phone number, you have the following options:

- If you want to use the Clipboard Dialer, tag the number to be dialed by
  pressing the right mouse button and drag the mouse pointer over it. The
  tagged number is highlighted at the display. Afterwards press the configured
  key combination (e.g. CTRL + SHIFT + D) at the keyboard.
- If you want to use the Desktop Dialer, tag the number to be dialed by pressing the right mouse button and drag the mouse pointer over it while pressing the configured (CRTL) key. A green line appears which indicates the tagged range. After releasing the right mouse button the tagged number is dialed.

**NOTICE:** If you want to cancel the dialing of a number, click within five seconds on the Close symbol in the screen pop up. If the string consists of characters, the search window opens

and displays the existing names that match the string in the directories. Clicking on an entry with the right mouse button opens a context menu with different phone numbers; you can call directly with the left mouse button.

# 6.3.3.2 How to Configure the Desktop Dialer and Clipboard Dialer

#### Step by Step

- 1) Click on Setup.
- 2) Click on My Preferences > Hot Keys.
- 3) If you want to use the Desktop Dialer, proceed as follow:
  - a) Select the Hot Key Enabled check box for Answer/Release call, Redirect/Transfer call, Display Call Traypop or Display Overview Traypop.
  - b) If you want to change the key/mouse combination for the Desktop Dialer, click in the rectangular box for Answer/Release call, Redirect/Transfer call, Display Call Traypop or Display Overview Traypop. Hold down one or more of the desired Shift, Ctrl and Alt keys and then click the additional keyboard button desired.
- 4) If you want to use the Clipboard Dialer, proceed as follow:
  - a) Select the Hot Key Enabled check box for via Clipboard.
  - b) If you want to change the key combination for the Clipboard Dialer, click in the rectangular box for via Clipboard. Hold down one or more of the desired Shift, Ctrl and Alt keys and then press the additional key desired for the key combination.
- 5) In the **Desktop Dial Timeout (seconds)** field, change the preset value (default 3) if required. Within the time period specified here, you can still cancel the dialing. At 0 seconds, dialing occurs immediately.
- 6) Click on Save.

After this, the defined key combination can be used to start the Dialer.

# 6.4 Conferences

In a conference, multiple participants (including external parties) can communicate with one another at the same time. The Conference Management function enables you to quickly and easily host different types of conferences and also to schedule them in advance.

#### **Types of Conferences**

The different types of conferences offer the following features:

	AdHoc	Meet Me	Permanent	Permanent Open
Usage	<ul><li>Phone-controlled</li><li>Application-controlled</li></ul>	Application- controlled	Application- controlled	Application- controlled
Start	Manually	Scheduled	<ul> <li>Manually</li> </ul>	• Manually

# **Application-controlled conference**

As a subscriber, you can initiate, control and manage a conference with the Conference Management feature of myPortal for Desktop, myAttendant or myPortal for Outlook. A license is required for the use of Conference Management.

### **Phone-controlled Conference**

As a subscriber, you can initiate a phone-controlled conference and then control it via the phone by the following methods:

- Call the desired conference participant and connect him or her to the conference
- · Extend a consultation call into a conference
- · Extend a second call into a conference

#### Virtual conference room

The virtual conference room enables you to follow a conference and its participants in a graphical environment and to also manage the conference if you are the conference controller. The virtual conference room shows the phone number, name and presence status to the conference participants, where available.

Symbol	Meaning
	Conference
	Adhoc conference
<b>G</b>	Schedule Outbound Call
<b>%</b>	Meet Me conference
4	Permanent Conference
<b>(\$</b>	Permanenet Open conference
46	No participants in conference
*	Conference controller
	Conference is being recorded
	Stop conference recording

Every arrow between the communication system and the conference controller or its participants indicates the direction of the connection setup from the viewpoint of the communication system.

#### Outbound:

The communication system calls the participant. Note that this applies to internal participants only if the subscriber has not enabled forwarding to voicemail.

#### Inbound:

The conference participants or conference controller dials into the conference using the dial-in number.

While participating in a conference, making a call or accepting another call disconnects the participant from the conference.

#### Dial-in number

The administrator can change the conference dial-in numbers that were set up during the basic installation. You can display the dial-in number for a conference.

#### **Conference Controller**

The initiator of a conference is automatically the conference controller until this is explicitly changed. Depending on the type of conference, the controller can:

- · Add or remove conference participants:
  - Removed participants do not remain in the conference.
- Disconnect or reconnect conference participants:
  - Disconnected participants remain in the conference. When the conference controller is connecting a conference participant, all other conference participants remain connected to one another. If there is only one participant connected, that participant will hear music on hold.
- · Record a conference
  - Conferences in which a participant is on hold cannot be recorded.
- Set another internal participant on the same node as the conference controller
- · Leave the conference without ending it:
  - The longest attending internal participant of the conference automatically becomes the conference controller.
- · End the conference

#### Conference tone

When connecting or disconnecting a conference participant, the other participants hear the conference tone. The administrator can activate or deactivate the conference tone.

## **Conference Participants**

Conference participants can leave the conference and optionally dial-into it again (Meet Me and permanent conferences). As long as a conference has only one participant, the participant hears music on hold. The administrator can specify whether multiple external conference participants are allowed. The maximum number of external conference participants is determined, among other things, by the number of available trunks.

### **Automatic Termination without a Conference Controller**

If there are only external subscribers left in a conference, the participants will hear an alert tone after a specified time period. Following a further timeout, the conference is automatically terminated by the communication system. The administrator can change these timeouts.

#### **Notification by Email and Outlook Appointment**

The system can automatically notify conference participants by email and, for Meet Me conferences, additionally through an Outlook appointment as an attachment (.ics):

Event	Notified conference participants	Outlook appointment			
New conference	All	Automatic creation			
Delete the conference		Automatic deletion			
Reschedule the conference		Automatic update			
Adding conference participants	Those affected	Automatic creation (those affected)			
Remove conference participants		Automatic deletion (those affected)			

This requires the administrator to have configured the sending of emails. In addition, an internal conference participant must have specified his or her email address. For external conference participants, the initiator of the conference must enter their individual email addresses.

**NOTICE:** For email notifications, no return acknowledgments are obtained for failed deliveries or absence messages, since the emails are sent directly from the system due to the integration of Web Collaboration.

# **Further Calls**

While participating in a conference, making a call or accepting another call disconnects the participant from the conference.

### Park, Toggle/Connect

The Park and Toggle/Connect features are not available in a conference.

#### **Call Charges**

Toll charges are assigned to the party who set up the toll call. When a conference is transferred to another conference controller, all further charges are assigned to that controller.

### **Video Monitoring**

Any ongoing video transmission must be terminated before participating in a conference.

### **Related concepts**

User Interface Elements on page 12 Web Collaboration on page 103

#### Related tasks

How to Specify your Email Address on page 136

# 6.4.1 Ad-hoc Conference

An ad-hoc conference occurs spontaneously and is started manually by the conference controller. The conference controller can save ad-hoc conferences in order to set them up again at some later point in time.

### Starting the Conference

The system opens the window with the virtual conference room automatically for all internal conference participants, provided they have started myPortal for Desktop with the user interface, myAttendant or myPortal for Outlook. The system calls all conference participants simultaneously. On joining the conference, each conference participant hears a greeting announcement with the name of the conference controller.

### **Recording the Conference**

Conference controllers can record a conference manually for themselves or for all connected internal conference participants, provided the live recording of calls has been activated in the system. Participants located in the own node receive the recording in the voicemail box; participants in other nodes, via e-mail. The duration of the recording is only limited by the available storage capacity of the system.

### **Ending the Conference**

The conference controller can end the conference in the client or simply hang up. Alternatively, the conference ends when all conference participants have left the conference.

#### **Expanding a Call to a Conference**

An internal subscriber who is conducting a call can convert the call to an ad-hoc conference and add further subscribers. For this, the subscriber must have a UC Suite Conference license.

## 6.4.1.6 How to Add Conference Participants

#### **Prerequisites**

A conference with you as the conference controller has been started in the virtual conference room.

#### Step by Step

- 1) Click on myMeetings.
- 2) Click on Symbol if the **myMeetings** tab does not appears.
- 3) Under the myMeetings tab, you can see your own Conferences.
- 4) Click on the desired conference.
- 5) Add the conference participants by one of the following methods:
  - · From the Favorites list:
    - Using the mouse, drag one of the participants from the **Favorites** into the **myMeetings** window.
  - · From a directory:
    - Using the mouse, drag one of the participants from the **Directories** into the **myMeetings** window.
  - · From the results of a search:
    - Search the directories (see How to Search in Directories on page 42) and then drag any of the participants from the listed results into the **myMeetings** window.
  - From the Participants tab:
    - Click on symbol if the **Participants** tab does not appears on the right side of the **myMeetings** window.
    - Enter one of the following details for the participant in the **Type a name** or number search field of the **Participants** tab: name or phone number in canonical or dialable format. Move your mouse over the desired name or phone number and click on + symbol on the right hand side of the name or phone number.
  - · Any participant:
    - Click on symbol in the **myMeetings** window. Enter one of the following details for the participant in the **Type a name or number** field of the **myMeetings** window: **name** or **phone number** in canonical or dialable format, and then click on **Save**.
- 6) If you want to select a specific station number for the participant, move your mouse above the relevant participant in the Participants tab and click on symbol.
  - The Participant Information window appears.
- Select the desired station number from the Phone Number drop-down list and click on OK.

## 6.4.1.10 How to Expand a Call into an Ad-hoc Conference

#### **Prerequisites**

You are conducting a call.

The screen pop (pop-up window) for incoming or outgoing calls is enabled.

You have a UC Suite Conference license.

#### Step by Step

- 1) During the call, click in the **Inbound Call from** ... or **Outbound Call to** ... screen pop on the **myMeetings** symbol. The **myMeetings** window opens with you set as the conference controller.
- 2) Add the conference participants by one of the following methods:
  - · From the Favorites list:

Using the mouse, drag one of the participants from the **Favorites** into the **AdHoc Conference** window. Select a station number from the **Number To Contact** drop-down list in the **Select Participant Contact Number** window and click on **OK**.

From a directory:

Using the mouse, drag one of the participants from the **Directories** into the **AdHoc Conference** window. Select a station number from the **Number To Contact** drop-down list in the **Select Participant Contact Number** window and click on **OK**.

· From the results of a search:

Search the directories (see How to Search in Directories on page 42) and then drag any of the participants from the listed results into the **AdHoc Conference** window. Select a station number from the **Number** 

To Contact drop-down list in the Select Participant Contact Number window and click on **OK**.

· Any participant:

Click in the AdHoc Conference window on Participants > Add Participant. Enter the following details for the participant in the Add Participants window: Name and Phone Number in canonical or dialable format, and then click on OK.

#### 6.4.1.11 How to End an Ad-hoc Conference

#### **Prerequisites**

An active conference with you as the conference controller has been started in the virtual conference room.

**NOTICE:** You can end an ad-hoc conference in any event by hanging up.

## Step by Step

1) Click on the relevant conference under the **myMeetings** tab and then click on **Stop**.

The Stop Conference pop-up window appears.

- 2) If you want to terminate the conference right now, enable the I would like to stop this conference now option.
- 3) You can also extend the conference's duration. To do this:
  - a) Disable the I would like to stop this conference now option.
  - b) Under **Extend Conference Time**, enter the time by which the conference you want to be extended and then click on **OK**

- 1) Click on myMeetings.
- 2) Click on Symbol if the **myMeetings** tab does not appears.
- 3) Under the myMeetings tab, you can see your own Ad-hoc Conferences.
- 4) Click on the conference that you want to delete.
- 5) Click on **Remove** symbol which is on the side of the conference's name under the **myMeetings** tab. If the conference has already started, it is terminated.
- 6) Click on OK.

#### Related tasks

How to Configure and Initiate an Ad-hoc Conference on page 71

## 6.4.2 Meet Me Conference

A Meet Me conference occurs at some point in the future with a defined duration and may be set up to recur repeatedly at the same time.

A Meet Me conference will run for the entire scheduled duration even if there are no connected participants. The conference controller saves a Meet Me conference under a specified name.

#### **Options for Configuring a Meet Me Conference**

The initiator of the conference can define the following properties:

- · Start time and End time
- · Recurring conference
- Presence of conference controller required
- Authentication of conference participants on joining the conference required (by entering a conference ID and password via the phone keypad).

**NOTICE:** Mobility Entry users must enter the code for DTMF suffix dialing before their authentication.

The default password for conferences is 123456. The conference controller can change this for the conference participants individually.

• Language of the announcements and invitations by email (by default, this is the language of the voicemail box).

 Direction for the connection setup for each conference participant (default: outbound).

#### Starting the Conference

The system opens the window with the virtual conference room at the scheduled time automatically for all internal conference participants, provided they have started myPortal for Desktop with the user interface or myPortal for Outlook. If the presence of the conference controller is required, the system first calls the controller. After the successful authentication of the controller, all the other conference participants are called simultaneously. Conference participants who have forwarded their calls to their voicemail boxes or who are determined to be absent by their presence status are not called. Depending on how the connection setup has been configured, the system calls the conference participants or the participants can dial in themselves. The system announces every participant who joins the conference by name, as in:

"... has joined the conference", provided the initiator has recorded his or her name announcement.

**NOTICE:** In order to enable the participants of a Meet Me conference without authentication to hear the name announcement at the start of the conference, you will need to have first already initiated a conference with authentication on one occasion.

#### Dialing In

Every conference participant can use the dial-in number to dial into the conference within the scheduled time period, regardless of which direction for the conference setup was set for that participant. Attempts to dial into the conference outside the scheduled time period result in a corresponding announcement.

## Forcing Authentication with the Star (\*) Key

The conference controller can set the conference so that each conference participant is forced to provide authentication by at least by pressing the \* key. This ensures that only the participants who are actually present are connected to the conference, as opposed to a voicemail box, for example.

#### **Extending the Conference**

Ten minutes before the scheduled end of the conference, the participants hear an announcement indicating that the conference is about to end and are offered the option of extending the conference by dialing a specific digit. Any conference participant can extend the conference by dialing that specific digit. The conference controller can extend the conference in myPortal for Outlook at any time.

## **Recording the Conference**

Conference controllers can record a conference automatically or manually for themselves or for all connected internal conference participants, provided the live recording of calls has been activated in the system. Participants located in the own node receive the recording in the voicemail box; participants in other nodes, via email. The duration of the recording is only limited by the available storage capacity of the system.

## **Ending the Conference**

The conference ends at the time scheduled for the end of the conference or if the conference controller terminates the conference.

## 6.4.2.1 How to Configure a Meet Me Conference

#### **Prerequisites**

Your administrator has configured a dial-in number for conferences.

- 1) Click on myMeetings.
- 2) Click on © symbol if the **myMeetings** tab does not appears.
- 3) Click on + symbol. The **myMeetings** window opens with you set as the conference controller.
- 4) Add any conference participants as needed.
- 5) Select in the myMeetings window, the I would like a call to be started automatically from the drop-down list.
- 6) Enter the Conference Name.
- 7) Enter a Start Date.
- 8) Enter a Start Time.
- 9) Enter the End Time.
- 10) If the conference is to occur repeatedly, select the either Daily Recurrence, Weekly Recurrence or Monthly Recurrence from the respective drop-down list. Otherwise select Occurs only once.
- **11)** If you want to delete a conference appointment time for a conference series, perform the following steps:
  - a) Click on **Edit** symbol which is on the right side of the drop-down list mentioned in the previous step .
  - b) Click on Exceptions.
  - c) Click on Add.
  - d) Select the relevant date in the Original Date/Time drop-down list.
  - e) Select Remove this recurrence.
  - f) Click on OK.
  - g) Click on Close.
  - h) Click on OK.

- **12)** If you want to reschedule a conference appointment for a conference series, perform the following steps:
  - a) Click on Edit symbol which is on the right side of the drop-down list mentioned in the previous step.
  - b) Click on Exceptions.
  - c) Click on Add.
  - d) Select the relevant date in the Original Date/Time drop-down list.
  - e) Click on Reschedule this recurrence.
  - f) Select a New scheduled date.
  - g) Select a new Start Time.
  - h) Click on OK.
  - i) Click on Close.
  - j) Click on OK.
- 13) Click on Advanced.
- **14)** Select the desired **Conference Language** for the announcements and the invitations by email (by default, this is the language the voicemail box).
- 15) Enable the check box This conference is an active conference.
- 16) If you want to mandate the authentication of conference participants using passwords, select the check box Request for a password when participant join.
- 17) If you want the conference to occur only when the conference controller is present, enable the check box This conference requires the controller to be present.
- 18) If you want the email invitations to be sent automatically to the conference participants, select the check box Automatically send email invitation to conference participants.
- 19) If you want the system to automatically record the conference, select the **Automatically record this conference** check box.
- 20) If you want to use Web Collaboration concurrently with this conference, select the Automatically start phone conference with web collaboration check box.
- 21) If you want to use Web Collaboration concurrently with this conference, select the Automatically start phone conference with web collaboration check box.
- 22) If you want to force the conference participants to authenticate by pressing the \* (star) key, select the check box Force called participant to enter "\*" (star) to join the conference.

**NOTICE:** This option is recommended if the conference participants do not have to authenticate via a password. This ensures that only the participants who are actually present are connected to the conference, as opposed to a voicemail box, for example.

- 23) If you want to add some introductory text to the invitation email or the **Information** tab, enter this in the **Notes**.
- 24) Click on Save.

- **25)** If you want to change the direction of the connection setup for a conference participant, proceed in the following steps:
  - a) Click on Participants symbol if the Participants tab does not appears.
  - b) Click on **i** symbol of the relevant conference participant The **Participant information** window appears.
  - Under **Direction**, click on **Outbound** or **Inbound** to change the direction.

- 13) Click on OK.
- 14) Click on Advanced.
- **15)** If you want to add some introductory text to the invitation email, click in the **Notes** input field and enter the desired text.
- 16) Click on Save.

## 6.4.3 Permanent Conference

A permanent conference is not subject to time restrictions. The conference participants can dial in at any time.

The conference controller saves a permanent conference under a specified name. The conference is retained until it is explicitly deleted.

### **Options for Configuring a Scheduled Conference**

The initiator of the conference can define the following properties:

 Authentication of conference participants on joining the conference required (by entering a conference ID and password via the phone keypad).

**NOTICE:** Mobility Entry users must enter the code for DTMF suffix dialing before their authentication.

The default password for conferences is 123456. The conference controller can change this for the conference participants individually.

 Language of the announcements and invitations by email (by default, this is the language of the voicemail box).

#### Starting the Conference

As soon as the first conference participant dials in, the system opens the window with the virtual conference room automatically for all internal conference participants, provided they have started myPortal for Desktop or myPortal for Outlook. All conference participants dial in themselves. The system announces every participant who joins the conference, as in: "... has joined the conference."

#### Dialing In

Every conference participant can use the dial-in number to dial into the conference at any time.

#### **Recording the Conference**

Conference controllers can record a conference automatically or manually for themselves or for all connected internal conference participants, provided the live recording of calls has been activated in the system. Participants located in the own node receive the recording in the voicemail box; participants in other nodes, via email. The duration of the recording is only limited by the available storage capacity of the system.

The **Information** tab appears.

More information about the conference can be found under the **Notes** area.

## 6.4.3.7 How to Change the Password for a Participant of a Permanent Conference

#### **Prerequisites**

You are the conference controller.

## Step by Step

- 1) Click on myMeetings.
- 2) Click on Symbol if the myMeetings tab does not appears.
- **3)** Under the **myMeetings** tab, you can see your own Permanent Conferences.
- 4) Click on the relevant permanent conference under **myMeetings** tab, in order to be displayed on screen.
- 5) Click on Participants symbol if the Participants tab does not appears.
- 6) Click on i symbol of the relevant conference participant.

The **Participant information** window appears.

- 7) Enter the new password under the **Password** field.
- 8) Click on OK.
- 9) Click on Save.
- 10) Click on Close.

## 6.4.3.8 How to Specify another Conference Controller

## **Prerequisites**

A conference with you as the conference controller has been started in the virtual conference room.

The new conference controller is an internal subscriber from the same node.

**NOTICE:** A different conference controller for an associated Web Collaboration session, for example, can only be set there.

## Step by Step

- 1) Click on myMeetings.
- 2) Click on Symbol if the **myMeetings** tab does not appears.
- 3) Under the myMeetings tab, you can see your own Conferences.
- **4)** Click on the desired conference under **myMeetings** tab, in order to be displayed on screen.
- 5) Move your mouse over the relevant conference participant that you want set as conference controller (in the participants tab) and click on i symbol. The **Participant Information** window appears.
- 6) Enable the Set as conference controller checkbox.
- 7) Click on OK.

#### **Related concepts**

#### **Prerequisites**

You are the conference controller.

#### Step by Step

- 1) Click on myMeetings.
- 2) Click on  $\mathfrak{C}$  symbol if the **myMeetings** tab does not appears.
- 3) Under the myMeetings tab, you can see your own Permanent Conferences.
- 4) Click on the permanent conference that you want to delete.
- 5) Click on Remove symbol which is on the side of the permanent conference's name under the myMeetings tab. If the permanent conference has already started, it is terminated.

#### Related tasks

How to Configure a Permanent Conference on page 90

## 6.4.4 Permanent Open Conference

Open conferences are intended for a fixed number of arbitrary participants. Any participant who has the requisite access data can dial into them.

The conference controller saves a permanent conference under a specified name. The conference is retained until it is explicitly deleted.

#### **Options for Configuring a Permanent Open Conference**

The initiator of the conference can define the following properties:

- The number of conference participants (max. 16).
- Authentication of conference participants on joining the conference required (by entering a conference ID and password via the phone keypad).

**NOTICE:** Mobility Entry users must enter the code for DTMF suffix dialing before their authentication.

The default password for conferences is 123456. The conference controller can change this for the conference participants individually.

- · The common conference ID for all conference participants.
- Language of the announcements and invitations by email (by default, this is the language of the voicemail box).

#### **Starting the Conference**

All conference participants dial in themselves. The system announces every internal participant who joins the conference, as in: "... has joined the conference."

#### Dialing In

Every conference participant can use the dial-in number to dial into the conference at any time.

#### **Recording the Conference**

Conference controllers can record a conference automatically or manually for themselves or for all connected internal conference participants, provided the live recording of calls has been activated in the system. Participants located in the own node receive the recording in the voicemail box; participants in other nodes, via email. The duration of the recording is only limited by the available storage capacity of the system.

## 6.4.4.1 How to Configure a Permanent Open Conference

## **Prerequisites**

Your administrator has configured a dial-in number for conferences.

- 1) Click on myMeetings.
- Click on symbol if the myMeetings tab does not appears.
- 3) Click on + symbol. The **myMeetings** window opens with you set as the conference controller.
- 4) Add any conference participants as needed.
- 5) Select in the myMeetings window, the I would like to create a conference room that is available to anyone from the drop-down list.
- 6) Enter the Conference Name.
- Select the maximum number of conference participants under Number of Channels

- 8) If you want to add some introductory text to the invitation email or the **Information** tab, enter this in the **Notes**.
- 9) Click on Advanced.
- **10)** Select the desired **Conference Language** for the announcements and the invitations by email (by default, this is the language the voicemail box).
- 11) Enable the check box This conference is active.
- **12)** If you want the system to automatically record the conference, select the **Automatically record this conference** check box.
- **13)** If you want to define the conference ID yourself, proceed in the following steps:
  - a) Select the Create your own conference ID check box.
  - b) Enter the desired **Conference ID** (4-8 characters) in the input field.
- 14) Click on Save.

## 6.4.4.2 How to Display your Own Permanent Open Conference

## Step by Step

- 1) Click on myMeetings.
- 2) Click on Symbol if the **myMeetings** tab does not appears.
- Under the myMeetings tab, you can see your own Permanent Open Conferences.
- **4)** Click on the relevant permanent open conference under **myMeetings** tab, in order to be displayed on screen.
- 5) If you want to view the general settings of the conference, click on **Edit** symbol.

## 6.4.4.3 How to Determine the Conference Controller of a Conference

#### Step by Step

- 1) Click on myMeetings.
- 2) Click on  $\mathfrak C$  symbol if the **myMeetings** tab does not appears.
- 3) Under the myMeetings tab, you can see your own Conferences.
- 4) Click on the relevant conference under myMeetings tab, in order to be displayed on screen.
- 5) If you want to display information about your own Conference, click on **Information** symbol.

The **Information** tab appears.

- The First Name and Last Name of the conference controller can be found on the right side of the \* symbol.
- Links to directly call or chat the conference controller can be found on the right side of the and symbols respectively.

#### 6.4.4.4 How to Determine the Dial-in Number of a Conference

#### **Prerequisites**

You are the conference controller.

**NOTICE:** As the conference controller, you can obtain the dialin number from the email with the invitation to the conference.

#### Step by Step

- 1) Click on myMeetings.
- 2) Click on Symbol if the **myMeetings** tab does not appears.
- 3) Under the myMeetings tab, you can see your own Conferences.
- **4)** Click on the relevant conference under **myMeetings** tab, in order to be displayed on screen.
- 5) Click on Information symbol.
  - The Information tab appears.
- **6)** The dial-in number can be found under **Conference DID** on the top of the **Information** tab.
- 7) Click on Close.

#### Related concepts

## 6.4.4.6 How to Display More Information of your Own Conference

#### Step by Step

- 1) Click on myMeetings.
- 2) Click on  $\mathfrak{C}$  symbol if the **myMeetings** tab does not appears.
- 3) Under the myMeetings tab, you can see your own Conferences.
- **4)** Click on the relevant conference under **myMeetings** tab, in order to be displayed on screen.
- 5) If you want to display information about your own Conference, click on **Information** symbol.

The **Information** tab appears.

 More information about the conference can be found under the Notes area.

## 6.4.4.7 How to Delete a Permanent Open Conference

#### **Prerequisites**

You are the conference controller.

## Step by Step

- 1) Click on myMeetings.
- 2) Click on  $\mathfrak{C}$  symbol if the **myMeetings** tab does not appears.
- Under the myMeetings tab, you can see your own Permanent Open Conferences.
- 4) Click on the conference that you want to delete.
- 5) Click on Remove symbol which is on the side of the conference's name under the myMeetings tab. If the conference has already started, it is terminated.
- 6) Click on OK.

## 6.4.5 Scheduled Outbound Call

A scheduled outbound call is started by the call scheduler after confirming the execution of the call through a screen pop, which appears on scheduled date and time.

If the call scheduler is busy at the time the scheduled outbound call is to be made, the communication system defers the scheduled outbound call until you are free again. Additionally, call scheduler is informed of any pending scheduled outbound call on starting and exiting myPortal for Desktop, in order to delete such calls or save them with a new scheduled time.

#### **Options for Configuring a Scheduled Outbound Call**

The initiator of the scheduled outbound call can define the following properties:

- Start time
- · Add participants

#### **Schedule Outbound Call and Licensing**

- If the user does not have an active Conference license, he will only be able to see the option: Schedule Outbound Call.
- On the other hand, if the user has an active Conference license, he will be able to see additional options: Ad-hoc, Meet Me, Permanent, Permanent Open conference.

When the scheduled outbound call has more than one participant (excluding the call scheduler), then the system will redirect the **myMeetings** window, to initiate an **Ad-hoc** conference instead.

#### Starting the Scheduled Outbound Call

The system opens a screen pop on the scheduled date and time to the call scheduler. From this screen pop, call scheduler can start the scheduled outbound call by clicking on **Dial** symbol.

#### Dialing In

If the call scheduler clicks on **Dial** symbol then the scheduled outbound call participant can use the **Answer** symbol from the **Inbound Call** screen pop to answer the scheduled outbound call.

#### Recording the Scheduled Outbound Call

Call schedulers can record a scheduled outbound call, provided the live recording of calls has been activated in the system. The duration of the recording is only limited by the available storage capacity of the system.

## 6.4.5.1 How to Configure a Scheduled Outbound Call

- 1) Click on myMeetings.
- 2) Click on  $\mathfrak{C}$  symbol if the **myMeetings** tab does not appears.
- Click on + symbol. The myMeetings window opens with you set as call scheduler.
- 4) Add a single call participant.
- 5) Select in the myMeetings window, the I would like to be reminded to start a call later from the drop-down list.
- 6) Enter a Reminder Date.
- 7) Enter a Reminder Time.
- 8) If you want to add some introductory text to the invitation email or the **Information** tab, enter this in the **Notes**.
- 9) Click on Save.

A screen pop will appear on the scheduled date and time. From this screen pop, call scheduler can start the scheduled outbound call by clicking on **Dial** symbol or delete it by clicking on **Remove** symbol. Additionally, in this window call scheduler can edit the parameters of this scheduled outbound call by clicking on **Edit** symbol. Finally, there are also the options of snooze the scheduled outbound call and open the **myMeetings** window with the **Snooze** and **Journal** symbols respectively.

**NOTICE:** When the scheduled outbound call has more than one participant (excluding the call scheduler), then the system will redirect the **myMeetings** window, to initiate an **Ad-hoc** or a **Meet Me** or a **Permanent** or an **Permanent Open** conference instead. Otherwise the scheduled outbound call is initiated.

# 6.4.5.2 How to Configure a Scheduled Outbound Call for a Contact from the Favorites List

#### Step by Step

- 1) Click on **Schedule Outbound Call** in the context menu for the relevant contact in the Favorites list.
  - The **myMeetings** window opens with you set as call scheduler, the selected contact as participant, and the **I would like to be reminded to start a call later** option from the drop-down list.
- 2) Enter a Reminder Date.
- 3) Enter a Reminder Time.
- **4)** If you want to add some introductory text to the invitation email, enter this in the **Notes**.
- 5) Click on Save.
- 6) Close myMeetings window.

A screen pop will appear on the scheduled date and time. From this screen pop, call scheduler can start the scheduled outbound call by clicking on **Dial** symbol or delete it by clicking on **Remove** symbol. Additionally, in this window call scheduler can edit the parameters of this scheduled outbound call by clicking on **Edit** symbol. Finally, there are also the options of snooze the scheduled outbound call and open the **myMeetings** window with the **Snooze** and **Journal** symbols respectively.

## 6.4.5.3 How to Configure a Scheduled Outbound Call for a Journal Entry

- 1) Click on the **Journal** tab or in the corresponding window.
- 2) Click on one of the groups: All Calls, Missed, etc.
- 3) Double-click on the triangle on the left of the relevant group to expand the associated Journal entries if required.
- 4) Click on the relevant entry.

- 5) Select Schedule Outbound Call in the context menu.
  - The **myMeetings** window opens with you set as call scheduler, the selected contact as participant, and the **I would like to be reminded to start a call later** option from the drop-down list.
- 6) Enter a Reminder Date.
- 7) Enter a Reminder Time.
- 8) If you want to add some introductory text to the invitation email, enter this in the **Notes**.
- 9) Click on Save.
- 10) Close myMeetings window.

A screen pop will appear on the scheduled date and time. From this screen pop, call scheduler can start the scheduled outbound call by clicking on **Dial** symbol or delete it by clicking on **Remove** symbol. Additionally, in this window call scheduler can edit the parameters of this scheduled outbound call by clicking on **Edit** symbol. Finally, there are also the options of snooze the scheduled outbound call and open the **myMeetings** window with the **Snooze** and **Journal** symbols respectively.

## 6.4.5.4 How to Display your Scheduled Outbound Call

#### **Prerequisites**

You are the call scheduler.

## Step by Step

- 1) Click on myMeetings.
- 2) Click on  $\mathfrak{C}$  symbol if the **myMeetings** tab does not appears.
- 3) Under the **myMeetings** tab, you can see your own Scheduled Outbound Calls.
- **4)** Click on the relevant scheduled outbound call under **myMeetings** tab, in order to be displayed on screen.
- **5)** If you want to view the general settings of the scheduled outbound call , click on **Edit** symbol.

## 6.4.5.5 How to Display More Information of your Own Scheduled Outbound Call

- 1) Click on myMeetings.
- 2) Click on  $\mathfrak{C}$  symbol if the **myMeetings** tab does not appears.
- Under the myMeetings tab, you can see your own scheduled outbound calls
- **4)** Click on the relevant scheduled outbound call under **myMeetings** tab, in order to be displayed on screen.

**5)** If you want to display information about your own scheduled outbound call, click on **Information** symbol.

The Information tab appears.

 More information about the scheduled outbound call can be found under the **Notes** area.

#### 6.4.5.6 How to Determine the Scheduled Date and Time of a Scheduled Outbound Call

#### Step by Step

- 1) Click on myMeetings.
- 2) Click on Symbol if the **myMeetings** tab does not appears.
- **3)** Under the **myMeetings** tab, you can see your own scheduled outbound calls.
- **4)** Click on the relevant conference under **myMeetings** tab, in order to be displayed on screen.
- **5)** If you want to display information about your own scheduled outbound call, click on **Information** symbol.

The **Information** tab appears.

 The date and time of the scheduled outbound call can be found under the Scheduled area.

## 6.4.5.7 How to Reschedule a Scheduled Outbound Call

## **Prerequisites**

You are the call scheduler.

#### Step by Step

- 1) Click on myMeetings.
- 2) Click on Symbol if the **myMeetings** tab does not appears.
- Under the myMeetings tab, you can see your own Scheduled Outbound Calls.
- **4)** Click on the relevant scheduled outbound call under **myMeetings** tab, in order to be displayed on screen.
- 5) Click on Edit symbol.
- 6) Select a new Reminder Date.
- 7) Select a new Reminder Time.
- 8) If you want to add some introductory text to the invitation email, enter this in the **Notes**.
- 9) Click on Save.

#### 6.4.5.8 How to Delete a Scheduled Outbound Call

## **Prerequisites**

You are the call scheduler.

#### Step by Step

- 1) Click on myMeetings.
- 2) Click on  $\mathfrak C$  symbol if the **myMeetings** tab does not appears.
- Under the myMeetings tab, you can see your own Scheduled Outbound Calls.
- 4) Click on the scheduled outbound call that you want to delete.
- 5) Click on **Delete** symbol which is on the side of the scheduled outbound call's name under the **myMeetings** tab and then click on **OK**.

## 6.5 Web Collaboration

The UC PC clients myPortal for Desktop (Windows) and myPortal for Outlook support the convenient integration of the separate product OpenScape Web Collaboration for simultaneous multi-media collaboration during phone calls and conferences. This provides quick access to functions such as desktop and application sharing, file sharing, co-browsing, whiteboarding, URL push, IM chat and video chat with multiple participants.

Web collaboration can be started by a subscriber during a phone call via the pop-up window of the UC PC client or by the conference controller of an active conference from within the conference. This opens the web collaboration session. A local installation of Web Collaboration on the UC PC client is not required. If an email program is available on the UC PC client, an email with the link to the web collaboration client can be sent to the communication partners. Detailed information on web collaboration can be found in the Web Collaboration product documentation.

When creating or editing a conference, the conference controller can also schedule a web collaboration session. On deleting or ending a conference, the associated web collaboration session is automatically deleted as well.

**NOTICE:** In order to enable UC PC clients to start web collaboration automatically, a direct connection to internet (no proxy) is needed.

## **Supported Types of Connections**

The web collaboration integration supports phone calls and phone-controlled conferences as well as the following types of application-controlled conferences:

- Ad-hoc conference
- Scheduled conference
- · Permanent conference

#### Integration of Web Collaboration

For the integration of Web Collaboration, the address of the Web Collaboration server must be known to the communication system. The vendor offers the web collaboration server as a service on the Internet (Public Server). Alternatively, it may also be possible to use a Custom Server located on the customer's own network or with a partner. If the server is on the customer's own network, it is usually addressed by the communication system on TCP port 5004 using

http. In the case of a hosted solution on the Internet (Public Server), a secure https connection is used instead, since the license number and password are transmitted over this connection. By default, TCP port 5100 is used for this purpose.

**NOTICE:** In order to use web collaboration, the communication system requires an Internet connection (default router and DNS server). Connections via proxy are not supported.

Internal conference participants with UC PC clients are automatically connected to the appropriate web collaboration session on starting the conference. To do this, FastViewer is automatically downloaded and opened in the background, which may take several seconds. External conference participants with known email addresses receive an email with an appropriate link to the Web Collaboration session.

**NOTICE:** Users working under a MAC OS must close the alert dialog for the terminated session manually after completion of a web collaboration session.

For a scheduled conference, it is possible to connect to the Web Collaboration session as early as 5 minutes before the start of the scheduled conference.

## **Instant Messaging and Web Collaboration**

Note that Instant Messaging of the system and Instant Messaging of a Web Collaboration session are mutually independent, i.e.: the instant messages from a UC PC client do not appear in a web collaboration session of the same participant, and vice versa.

#### **Related concepts**

Conferences on page 66

#### Related tasks

How to Start Web Collaboration During a Call on page 63

#### 6.5.1 How to Start a Web Collaboration Session

#### **Prerequisites**

Access to the Web Collaboration server is set up in the communication system.

An email program is installed on the client PC.

Screen pops for inbound and outbound calls have been activated.

You are currently conducting a call or participating in a conference as a conference controller.

#### Step by Step

1) Click on the **Start Collaboration** symbol in the **Inbound Call** screen pop or the **Outbound Call to ...** screen pop.

The web collaboration session (fastviewer) is started. In addition, the email program opens, and an email with a link to the web collaboration client is created.

**NOTICE:** The email body which includes the invitation to the web collaboration is default and can not be changed.

- 2) Add the email address(es) and send the email.
- **3)** As soon as a communication partner launches the Web Collaboration client, he or she is added to the web collaboration session.

## 6.5.2 How to End a Web Collaboration Session

#### **Prerequisites**

Screen pops for inbound and outbound calls have been activated.

You are currently conducting a call or participating in a conference.

A web collaboration session has been started.

#### Step by Step

Click on the **Stop Collaboration** symbol in the **Inbound Call** screen pop or the **Outbound Call to ...** screen pop.

The web collaboration session (fastviewer) is started. In addition, the email program opens, and an email with a link to the web collaboration client is created.

**NOTICE:** The email body which includes the invitation to the web collaboration is default and can not be changed.

## 6.6 Voice and fax messages

The Voicemail and Fax services integrated in the system enable subscribers to receive and manage voicemails and fax messages via myPortal for Desktop and myPortal for Outlook. Fax messages can be sent by subscribers using Fax Printer.

## 6.6.1 Voicemail Box

The voicemail box records voicemail messages and recorded calls centrally. You can access these messages using myPortal for Outlook.

You can view or edit the settings of your voicemail box; for example, you can select the language of the voicemail box, determine its call number, switch between recording and announcement modes, control the announcement of

your Presence status, record your announcements and import announcements. On importing announcements, The system performs the automatic level control and normalization needed to meet the "USA / TIA 968 Signal Power Limitations" requirements.

**NOTICE:** In order to enable callers to reach your voicemail box on **Busy** and **No Answer**, the administrator must set up call forwarding to your voicemail box. Alternatively, you can also do this yourself by setting up a "call diversion after time" on your phone.

#### **Determining the Call Number of the Voicemail Box**

You can determine under which extension you can reach the voicemail box from any phone to listen to your voicemails or change your Presence status, for example.

**NOTICE:** Information on the Phone menu can be found in the Quick Reference Guide documentation of the UC Suite Telephone User Interface (TUI).

## Selecting the Recording or Announcement Mode

In Recording mode, callers can leave a message for you on reaching your voicemail box exactly as with an answering machine, whereas in Announcement mode, they will only hear your announcement. You can specify this setting separately for every Presence status.

#### **Announcements**

You can record or import the following types of announcements:

Name announcement:

Your name announcement is used at the start of conferences for which you have invited others and to announce when you join a conference. In addition, the name announcement you have recorded is used as a greeting when you have enabled the announcement of your Presence status for the caller involved and your Presence status is not **Office**, **CallMe** or **Do Not Disturb**.

· General personal greeting

This announcement is heard by callers in default mode (i.e., when no custom profiles of the personal AutoAttendant are enabled) on reaching your voicemail box. For example: "I am unfortunately unable to take your call at this moment ..."

Personal greeting for Busy:

This announcement is heard by callers in default mode (i.e., when no custom profiles of the personal AutoAttendant are enabled) on reaching your voicemail box when your line is busy. For example: "I am currently on the phone and unable to take your call ..." If no personal greeting for **Busy** has been recorded, callers will hear your general personal greeting.

Personal greeting for No Answer:

This announcement is heard by callers in default mode (i.e., when no custom profiles of the personal AutoAttendant are enabled) when their calls are forwarded to your voicemail box manually or on no answer after a specific

amount of time. For example: "I am unfortunately unable to take your call at this moment ..." If you have not recorded any personal greeting for **No Answer**, callers will hear your general personal greeting.

• Personal announcements for custom profiles of the personal AutoAttendant:

These announcements are not used by the voicemail box in default mode, but only in conjunction with the personal AutoAttendant.

**NOTICE**: Before using announcements or music from other sources, make sure that you do not infringe on any copyrights.

The voicemail box can generate situation-based announcements of your Presence status (except for **Office**, **CallMe** and **Do Not Disturb**) with an indication of your scheduled time of return; for example: "xxx is in a meeting until two thirty p.m. today". You can enable or disable the announcement of your Presence status for specific callers and for all external callers separately.

In default mode, the voicemail box plays back announcements in the following order (from left to right):

Profile	Name announcement	Announcement of your Presence Status	Personal greeting
Busy	-	-	for <b>Busy</b>
			(if not recorded: general)
No answer	-	-	for No Answer
			(if not recorded: general)
Meeting	x (if you have enabled the announcement of your Presence status for the caller involved)	x (if you have enabled the announcement of your Presence status for the caller involved)	general
Sick			
Break			
Gone Out			
Vacation			
Lunch			
Gone Home			
Do Not Disturb	-	-	general

## Example: Announcement of your Presence status is enabled for the caller

Profile	Name announcement	Announcement of your Presence Status	Personal greeting
Meeting	"Natalie Dubios"	"is in a meeting until two thirty p.m. today".	"I am unfortunately unable to take your call at the moment"

#### Example: Announcement of your Presence status is disabled for the caller

Profile	Name announcement	Announcement of your Presence Status	Personal greeting
Gone Out	-	-	"I am unfortunately unable to take your call at the moment"

#### **Central AutoAttendant**

The central AutoAttendant enables the administrator of your communication system to offer callers time-based choices to forward their calls to numbers he or she has defined or to your voicemail box. As with the personal AutoAttendant, callers signal their choices by entering digits at the phone. Due to the central AutoAttendant, further announcements may follow those described above.

#### **Announcement of your Presence Status**

You can define whether callers should hear the announcement of your Presence status on reaching your voicemail box. You can enable or disable this collectively for all external callers and for specific subscribers.

#### Retrieving your Voicemail through the Attendant

Using myAttendant, you can grant or deny the Attendant permission to access your voicemails and Fax messages. In the latter case, the Attendant can only determine how many messages you have.

## **Bypassing the Password Prompt**

If you call the voicemail box from one of your additional phone numbers, the password prompt can be bypassed if configured so by the system administrator. This setting also applies to the phone notification service of the voicemail box.

## Language of the Voicemail Box

You can define in which language the voicemail box plays back the menu choices and the internal system announcements.

#### Voicemail handling

If an incoming call is answerd by the the voicemail box and the caller records a message, the call will be visible in the Voicemail inbox as a voicemail entry.

If an incoming call is answerd by the the voicemail box and the caller does not record a message, the call will be visible in the Journal as a missed call.

### 6.6.1.9 How to Select the Language of the Voicemail Box

### Step by Step

- 1) Click on Setup.
- 2) Click on Communications > VoiceMail Settings.
- 3) Select the VoiceMail Language in the drop-down list.
- 4) Click Save.

### 6.6.2 Managing Voicemail

You can listen to and forward voicemails, for example, or move them to another folder, save them as WAV files or call the sender.

#### **Folders for Voicemail**

myPortal for Desktop organizes voice messages in the following folders:

- Inbox
- Played
- Saved
- Deleted

### **Displaying Voicemail Messages**

The following symbols identify different types of voicemail:

Symbol	Type of voicemail
-	Voicemail to a subscriber
4	Voicemail to a group
	Recorded call
*	Recorded Conference

The List view of voicemails shows the following details:

· Symbol for the type of voicemail

#### **Unified Communications**

- Date
- Time
- · Group, if available
- · Call number, if available
- · Last Name, if available

For recorded conferences: conference name, if available; otherwise, Last Name of the second conference participant, if available

- · First Name, if available
- · Company, if available
- Priority

Color coding: urgent (rot), private (blue), normal (black). When listening to the voicemail Inbox, an announcement notifies you of the number of messages per priority.

Duration

#### **Retention Period for Voicemail**

The communication system automatically deletes voicemails after a defined retention period (which can be configured by the administrator) expires.

### Voicemail for Groups

The administrator can set up groups for voice messages with a separate call number for each group. The communication system forwards voice messages to all members of a specific group. As soon as one of the subscribers has listened to a new message, that message is flagged as "played" for all group members. If a group member deletes a message, that entry is also deleted for all other group members.

**NOTICE:** For a voicemail group to be able to receive voicemail messages, at least one user with a voicemail license is required. Users of the same group without voicemail licenses however, will not be able to use the voicemail features or access the voicemail menu.

### Listening to Voicemail

You can optionally listen to voice messages on the phone or your PC. When a new voice message is listened to for the first time, the communication system moves it automatically from the **Inbox** folder to the **Played** folder.

#### Calling the Sender of a Voicemail

You can call the sender of a voice message.

### Forwarding a Voice Message

You can forward a voice message easily to other internal subscribers.

### Moving a Voice Message

You can move a voice message to another folder.

### Saving a Voice Message as a File

**NOTICE:** The communication system saves voice messages for a limited period of time, which can be configured per folder by the administrator. When this time period expires, the voice messages are automatically deleted by the communication system.

You can save a voice messages as a WAV file in the file system of your PC to archive it permanently or send it to any recipient by email.

### **Voicemail Management Menu Accessibility**

To access and manage voicemail messages through your client application, it is essential to have a personal voicemail license assigned directly to your account. Please note that mere membership in a voicemail group does not confer the necessary permissions for listening to or managing voicemails within the application. This feature is exclusively available to individual users who have been granted a personal voicemail license.

### 6.6.2.3 How to Call back the Sender of a Voice Message

### **Prerequisites**

The caller's phone number has been transmitted.

### Step by Step

- 1) Click on the Voice Messages tab or in the corresponding window.
- 2) Click on the desired folder, e.g., Played.
- 3) Click on the desired voicemail.
- **4)** In the context menu, click **Dial**, and if the context menu offers several phone numbers for selection, click on the desired number.

### 6.6.2.4 How to Forward a Voicemail Message

- 1) Click on the Voice Messages tab or in the corresponding window.
- 2) Click on the desired folder, e.g., Played.
- 3) Click on the desired voicemail.
- 4) Click on Forward Message, in the context menu.
- **5)** To sort the list of recipients, click on the column headers **Extension** or **Name** to sort by that criterion in alphanumeric ascending order.
- 6) If you want to reverse the sort order of the list of recipients, click again on the column header.
- 7) Activate the check box for the desired recipient or recipients.

- 8) If you want to add a comment, proceed in the following steps:
  - a) Click on Comment.
  - b) Click on **Start**. The voicemail box will now call you on your phone.
  - c) Accept the call from the voicemail box.
  - d) Speak out the text of your comment after the tone.
  - e) Click on Stop.
  - f) If you want to listen to the comment on the phone, click on **Listen**. To exit the playback loop, click on **Stop**.
  - g) If you want to record the comment again, click on Start again.
- 9) Click on Forward.

### 6.6.2.5 How to Move a Voice Message

### Step by Step

- 1) Click on the Voice Messages tab or in the corresponding window.
- 2) Click on the desired folder, e.g., Played.
- 3) Click on the desired voicemail.
- 4) Select the desired folder in the context menu under **Move Message to** > ....

### 6.6.2.6 How to Save a Voice Message as a WAV File

#### Step by Step

- 1) Click on the Voice Messages tab or in the corresponding window.
- 2) Click on the desired folder, e.g., Played.
- 3) Click on the desired voicemail.
- 4) Click on Save as WAV in the context menu.
- 5) Select a folder in the **Save** window, enter a file name of your choice in the input field, and click **Save**.

### 6.6.2.7 How to Sort Voice Messages

#### Step by Step

- 1) Click on the Voice Messages tab or in the corresponding window.
- 2) Click on the desired folder, e.g., Played.
- 3) Click on one of the column titles: Type, Date, Time, Group Name, Call no, Last Name, First Name, Company Name, Priority or Duration to sort the voicemails by this criterion in ascending alphanumeric order.
- 4) If you want to reverse the sort order, click again on column header.

### 6.6.2.8 How to Delete a Voicemail

- 1) Click on the Voice Messages tab or in the corresponding window.
- 2) Click on one of the folders: Inbox, Played or Saved.

- 3) Select one of the following options:
  - · Click on the desired voicemail.
- 4) Select Move Message to > Deleted in the context menu.
- 5) If you want to delete the Voice messages permanently:
  - a) Click on the Deleted folder.
  - b) Select the desired voice message.
  - Select Move Message to > Permanently Delete Message in the context menu.

### 6.6.2.9 How to Pop out the Voice Messages Tab

The Voice Messages tab can pop out of the main window of myPortal for Desktop.

### Step by Step

- 1) Click on the Voice Messages tab or in the corresponding window.
- 2) Click on under the Voice Messages tab.
- Click on the Pop out View option.
   The Voice Messages pop up window appears.
- **4)** If you want the **Voice Messages** window to pop in the main window of myPortal for Desktop, you just close the **Voice Messages** window.

### 6.6.3 Fax Box

The Fax box saves Fax messages centrally. You can access these messages via the UC client.

You can view or edit the following settings of your Fax box:

#### **Determining your own Fax Number**

You can determine under which fax number you can be reached.

### **Retrieving Fax Messages through the Attendant**

Using myAttendant, you can grant or deny the Attendant permission to access your fax messages and voicemails. In the latter case, the Attendant can only determine how many messages you have.

### 6.6.3.1 How to Determine your own Fax Number

### **Prerequisites**

Your administrator has configured a Fax number for you.

### Step by Step

- 1) Click on Setup.
- 2) Click on Personal Details > My Personal Details.
- 3) You will find your fax number in the Fax Number field.
- 4) Click on Close.

# 6.6.4 Managing Fax Messages

You can display or forward fax messages, for example, or move them to another folder, save them as PDF or TIFF files and even call the sender.

### Folder for Fax Messages

myPortal for Desktop organizes fax messages in the following folders:

- Inbox
- Read
- Deleted
- · Sent Items:

Contains the fax messages already sent by the communication system

Sending Items

Contains queued fax messages that have not yet been sent The communication system tries to transmit a fax message up to 5 times within 25 minutes. The **Progress** of each fax message being sent is indicated by a progress bar.

### **Details of Fax Messages**

Depending on the folder involved, the List view of the fax messages shows different combinations of the following details: **Date**, **Time**, **Call number**, **Last Name**, **First Name**, **Company**, **Fax Group**, **Pages**, **Status**, **Destination** and **Progress**.

### **Retention Period for Fax Messages**

The communication system automatically deletes fax messages for which the following retention periods are exceeded:

Fax message	Retention period (days)
New	120
Read	365
Sent	365
Deleted	60

### **Fax Messages for Groups**

The administrator can set up groups for fax messages with a separate Fax number for each group. The communication system forwards fax messages to a group to each group member. As soon as one of the subscribers has viewed a new message, the message is flagged as "read" for all group members. If a group member deletes a message, that entry is also deleted for all other group members.

### Calling the Sender of a Fax Message

You can call the sender of a fax message.

#### Forwarding a Fax Message

You can forward a fax message to other internal subscribers.

#### Saving a Fax Message as a File

You can save a fax message as a PDF or TIFF file in the file system of your PC to archive it permanently.

Your administrator can configure whether the fax message is stored as a PDF or a TIFF file on a is stored basis.

### Sending Fax Messages as E-Mails

You can send a fax message as a PDF or TIFF file by e-mail to any recipient.

### **Displaying Fax Messages**

When a new fax message is viewed for the first time, the communication system moves it automatically from the **Inbox** folder to the **Read** folder.

#### **Fax Transmission Report**

You can display the transmission report of a fax message in the web browser.

#### Related concepts

### 6.6.4.1 How to Display a Fax Message

### **Prerequisites**

Fax messages are stored as either PDF or TIFF files (configurable by the administrator on a system-wide basis) The selected file type must be associated with an application that can display this file.

- 1) Click on the Fax Messages tab or in the corresponding window.
- 2) Click on the desired folder, e.g., Inbox.
- 3) Select View Fax in the context menu of the relevant fax message.
  If a fax message is partially received, an exclamation mark flag is shown next to the number of received pages, indicating that the message is not complete.

### 6.6.4.2 How to Call the Sender of a Fax Message

### Step by Step

- 1) Click on the Fax Messages tab or in the corresponding window.
- 2) Click on the desired folder, e.g., Read.
- 3) In the context menu of the desired fax message, click on Dial symbol. If the context menu offers several phone numbers for selection, click on Dial symbol next to the desired number.

### 6.6.4.3 How to Forward a Fax Message

### Step by Step

- 1) Click on the **Fax Messages** tab or in the corresponding window.
- 2) Click on the desired folder, e.g., Read.
- 3) Click on Forward Message in the context menu of the desired fax message.
- **4)** Enter the fax number of the recipient in canonical or dialable format in the **Forward Message** window.
- 5) Click on + to add this recipient to the fax message.
- **6)** If you want to send the fax to further recipients, click in the input field and repeat steps 4 through 5 accordingly.

**NOTICE:** You can also add further recipients by searching in a directory.

- 7) If you want to remove a recipient, proceed in the following steps:
  - a) Click in the list of **Recipients** on the desired entry.
  - b) Press the Remove key.
- 8) Click on OK.

### 6.6.4.4 How to Move a Fax Message

### Step by Step

- 1) Click on the Fax Messages tab or in the corresponding window.
- 2) Click on the desired folder, e.g., Read.
- 3) Select the desired folder in the context menu of the desired fax message under **Move Message to** > ....

### 6.6.4.5 How to Save a Fax Message

### **Prerequisites**

Your administrator has configured whether the fax message should be saved as a PDF or a TIFF file on a system-wide basis.

### Step by Step

1) Click on the Fax Messages tab or in the corresponding window.

- 2) Click on the desired folder, e.g., Read.
- 3) Click on the desired fax message.
  - If you select more than one fax messages, go to Step 6
- 4) Click in the context menu of the desired fax message on **Save as tiff** or **Save as PDF**.
- **5)** Select a folder in the **Save** window, enter a file name of your choice in the input field, and click **Save**.
- 6) If you have selected multiple fax messages, a dialog appears.
  - a) Enter the save path in the **To** field.
  - b) Select the file type to be exported.
  - c) Click **Save** to save all selected fax messages.

### 6.6.4.6 How to Sort Fax Messages

#### Step by Step

- 1) Click on the Fax Messages tab or in the corresponding window.
- 2) Click on the desired folder, e.g., Read.
- 3) Click on one of the column titles: Date, Time, Call no, Last Name, First Name, Company Name, Fax Group or Pages to sort the Fax messages by this criterion in ascending alphanumeric order.
- 4) If you want to reverse the sort order, click again on column header.

### 6.6.4.7 How to Display an Overview of Fax Messages in the Send Queue

### **Prerequisites**

You have sent fax messages with Fax Printer.

### Step by Step

- 1) Click on the Fax Messages tab or in the corresponding window.
- 2) Click on the Sending Items folder.
- 3) Click on one of the column titles: Date, Fax Group, Last Name, First Name, Company, Destination or Pages to sort the fax messages by this criterion in ascending alphanumeric order. If you want to reverse the sort order, click again on column header.

#### Related concepts

Fax Box on page 118

# **6.6.6 Notification Service for New Messages**

The communication system can optionally notify you about new voice and fax messages by e-mail, by phone or with an SMS.

The Notification Service works as follows:

Notification	for voicemail	for fax message
E-mail	You receive an e-mail with the message as a WAV file, the date and time it was received, the duration of the message and, if available, the phone number and name of the sender. If the size of the WAV file exceeds 10 MB (average 1MB/min), it is not attached to the e-mail. Voicemails with "urgent" priority are flagged as e-mails with "High" importance. E-mails with a voicemail have a separate symbol in Outlook. If you are using an IMAP mailbox that shows only the e-mail headers, the usual e-mail icon will appear instead.	You receive an e-mail with the message as a PDF or TIFF file, the date and time it was received, the number of pages and, if available, the phone number and name of the sender. If the size of the PDF or TIFF file exceeds 10 MB, it is not attached to the e-mail. E-mails with a Fax message have a separate symbol in Outlook. If you are using an IMAP mailbox that shows only the e-mail headers, the usual e-mail icon will appear instead.
SMS	You receive an SMS about the phone number defined by you.	received message at the
by phone	Your voicemail box calls you at the number you have specified and plays back the message to you.	-

You can enable or disable every type of notification for each Presence status individually.

The notification by phone can be restricted to the business hours configured by your administrator. You can define the number and intervals for the repeated attempts for the notification by phone.

#### 6.6.6.3 How to Enable or Disable SMS Notification

### **Prerequisites**

The administrator of your communication system has defined an appropriate SMS template for you.

### Step by Step

- 1) Click Setup.
- 2) Select one of the following options:
  - If you want to enable or disable the notification for voice messages, click on Communication > VM Notification.
  - If you want to enable or disable the notification for fax messages, click on Communication > Fax Notification.
- 3) Select one of the options below in the SMS row of the Notification table for each column with one of the following Presence statuses: Office, Meeting, Sick, Break, SMS of the Office, Vacation, Lunch, Home or Do Not Disturb:
  - If you want to activate the notification for a Presence status, enable the corresponding check box.
  - If you want to deactivate the notification for a Presence status, clear the corresponding check box.
- 4) Click Save.

**NOTICE:** Depending on the mobile phone provider that the mobile phone owner uses, the corresponding charges will be applied for each SMS.

# 6.7 Instant Messaging

Instant Messaging refers to communicating with instant messages (usually called a chat).

# 6.7.1 Instant Messaging

Instant Messaging enables you to chat with other peers. The communication system supports instant messaging with users of UC Suite and multi-user chats (or a combination of both).

Sent and received instant messages are presented to you and your communication partners as a dialog.

The status of the relevant subscriber is indicated in the right top corner of the **Instant Messaging** window.

Symbol	Status
online	Logged in

If one of the communication partners is offline, the following occurs with the instant message, depending on the type of the selected recipient:

Recipients	Behavior
Individual subscribers	The instant message is displayed at the next login.
Group in Favorites	The instant message is never displayed for the subscribers who are offline.

#### Multi-user chat

A multi-user chat is the exchange of instant messages with multiple communication partners.

### **Instant Messaging and Web Collaboration**

Note that Instant Messaging of the system and Instant Messaging of a Web Collaboration session are mutually independent, i.e.: the instant messages from a UC client do not appear in a Web Collaboration session of the same participant, and vice versa.

### **Instant Message Window**

The **Instant Message** consists of the following areas:

• User area (1)

This area shows every participating communication partner as a symbol or with a picture, if available.

Message area (2)

This area shows the current presence status and the instant messages of all the chatting subscribers.

You can also see:

- When someone is typing a message to you by an indicator on the bottom left of the chat window.
- What messages someone has seen by a "Seen by" label.
- Input area (3)

This area contains the input field for the instant messages.

### **Related concepts**

### 6.7.1.2 How to Delete an Instant Message

You can delete a single message or all messages that you have sent in a conversation.

### **Prerequisites**

Instant Messaging is enabled in the system.

### Step by Step

1) Click on Messages.

The **Instant Message** window appears.

- 2) Select a conversation and:
  - a) To delete a single message that you have sent, hover over the message and click on the **X** button.

The message is deleted for all participants.

b) To delete all your messages in the conversation, click on the button and select **Delete Messages...** 

All your messages are deleted for all participants.

**NOTICE**: The option **Delete Messages...** is also available by right clicking on the conversation in the conversation list.

### 6.7.1.3 How to Leave an Instant Message Conversation

You can leave a conversation at any time.

When you leave a conversation with only one person, the conversation is permanently deleted for both of you.

When you leave a conversation with multiple people, the conversation is removed from your conversation list but other participants can continue to use it.

Before leaving a conversation, you can delete all your messages in it.

#### Step by Step

1) Click on Messages.

The Instant Message window appears.

2) Select the conversation you want to leave, click on the button and select Leave.

A pop-up window appears.

- 3) If the conversation is with only one person, click on OK.
- 4) If the conversation is with multiple people, do one of the following:
  - a) Click on **Yes**, if you want to delete all your messages in the conversation before you leave.
  - b) Click on No, if you want your messages to remain in the conversation.

**NOTICE:** The option **Leave** is also available by right clicking on the conversation in the conversation list.

### 6.8 AutoAttendant

Depending on the presence status of the called party, the AutoAttendant offers callers options to route voice calls to fixed numbers or their voicemail box. Callers signal their choice by entering digits at the phone.

### 6.8.1 Personal AutoAttendant

The personal AutoAttendant offers callers the option of forwarding their voice calls to the phone numbers defined by you or to your voicemail box, depending on your Presence status. Callers signal their choice by entering digits at the phone.

#### **Custom Profiles for the Personal AutoAttendant**

For every Presence status there is a custom profile in which you can define the choices for your callers. You can activate or deactivate each profile separately. By default, no profile is active. When you deactivate a profile, the default behavior of your voicemail applies to the Presence status involved.

#### **Announcements**

When this profile is activated, the voicemail box plays back the following announcements:

Name announcement:

If you have enabled dynamic announcements, the name announcement you recorded is used for the greeting, unless your Presence status is **Office**, **CallMe** or **Do Not Disturb**.

Dynamic announcements:

If you have enabled dynamic announcements, the voicemail box generates situation-based announcements for your Presence status (except for **Office**, **CallMe** and **Do Not Disturb**) with an indication of the scheduled time of your return, e.g., "... is in a meeting until two thirty p.m. today". You can activate or deactivate the playback of dynamic announcements individually for each profile. If the dynamic announcements for a profile have been enabled, you can activate or deactivate the announcements for your Presence status for certain callers and for all external callers separately.

· Personal announcement for the profile:

Before you activate a profile, you must record a personal announcement for this profile that indicates to your caller the appropriate digits and associated choices, e.g.: To leave a message, press 1. To speak with my representative, press 2. To forward this call to my mobile phone, press 3." When you disable dynamic announcements for the profile, you may find it useful to start your personal announcement by indicating your Presence status.

The voicemail box plays back announcements for a profile in the following order (from left to right):

Profile	Name announcement	Dynamic greetings	Personal announcement for profile
Busy	-	x	x
No answer	-	x	x
Meeting	x (if dynamic	x (if dynamic	x
Sick	announcements have been enabled)	announcements have been enabled)	
Break			
Out of Office			
Holiday			
Lunch			
Home			
Do Not Disturb	-	-	x

### Example: dynamic announcements enabled

Profile	Name announcement	Dynamic greetings	Personal announcement for profile
Meeting	"Natalie Dubois"	"is in a meeting until two thirty p.m. today".	"To leave a message, press 1. To speak with my representative, press 2."

### Example: dynamic announcements disabled

Profile	Name announcement	Dynamic greetings	Personal announcement for profile
Out of Office	-	-	"I am currently out of the office. To leave a message, press 1. To speak with my representative, press 2. To forward this call to my mobile phone, press 3."

NOTICE: In case of "Busy" and "No answer" profiles:

-) Without "**Skip dynamic greeting**" set, voicemail box plays back the following announcements:

Dynamic greeting - profile announcement - 'please leave a message after the tone ...'

-) With "**Skip dynamic greeting**" set, voicemail box plays back the following announcements:

profile announcement - 'please leave a message after the tone ...'

#### **Actions**

When editing the profile, you can define the appropriate actions for the digits indicated in the announcement.

Record

The caller can leave a message in your voicemail box.

Transfer

The caller is redirected to a destination defined by you.

- None -

The announcements for this profile are repeated.

### 6.8.1.1 How to Edit a Profile for the Personal AutoAttendant

### **Prerequisites**

You have recorded an announcement for the relevant status.

### Step by Step

- 1) Click Setup.
- Click VoiceMail Profiles and then on the profile for the corresponding status.

The available profiles are: Busy, No Answer, Meeting, Sick, Break, Out of Office, Holiday, Lunch, Home.

- 3) In the row with the appropriate digit, select one of the following options for the desired Action:
  - If the callers are to be redirected to the voicemail box on entering this digit, select **Record**.
  - If the callers are to be transferred to another destination on entering this digit, select **Transfer**.
  - If no action is to be taken on entering this digit, select # None #.
- **4)** If you have selected **Transfer**, enter the phone number in dialable format or in canonical format in the **Destination** field.

### **Unified Communications**

- 5) Select one of the following options for the function of the profile:
  - If you want to activate the profile, enable the **Profile Active** check box.
  - If you want to deactivate the profile, disable the **Profile Active** check box.
- **6)** Select one of the following options for the announcement of your Presence status:
  - If you want your voicemail box to announce your Presence status, clear the **Skip Dynamic Greeting** check box.
  - If you do not want your voicemail box to announce your Presence status, enable the Skip Dynamic Greeting check box.

### 7) Click Save.

### **Related concepts**

# 7 Configuration

You can configure myPortal for Desktop to suit your requirements by editing your personal data or the program settings, for example.

**NOTICE:** When a new extension is created on the system, both first name and last name fields are synchronized to the UC Suite package. This synchronization happens when system restarts or any settings changed for the station in WBM.

### **Defining Additional Phone Numbers**

Additional phone numbers are typically used for:

- Status-based call forwarding
- CallMe Service

You can individually configure whether or not your mobile number, external number 1, external number 2 and private number are to be displayed in the internal directory. The remaining phone numbers are always displayed in the internal directory.

#### **Providing your own Picture**

If you provide your own picture, it will be shown to other subscribers when they position their mouse pointers over your entry in the internal directory (**Extension** column) or in the Favorites list. You can use an image of any file size. The communication system saves a copy with a width and height restricted to 200 pixels.

### **Automatic Login**

If you use an automatic login, the Login window is not displayed. For security reasons, you should avoid using the automatic login if you have shared user accounts.

#### **Hotkeys (Windows)**

You can use any key, possibly in combination with Ctrl or Alt and the Shift key, as hotkeys for the following functions:

- · Answer/Disconnect call
- Forward/Transfer call
- · Task bar icon for call

(Screen pop for calls)

Desktop Dialing

The only precondition is that the key or key combination is not already being used by another application.

#### **User name**

You can change the user name for your login.

### Related concepts

### 7.1 How to Edit your own Name

### Step by Step

- 1) Click on Setup.
- 2) Click on Personal Details > My Personal Details.
- 3) Enter your name in the fields First Name and Last Name.

**NOTICE:** All Latin1 characters (ISO-8859-1, Western European) are allowed.

#### NOTICE:

If you want to change your first and last name, this has to be done by the administrator. Otherwise, the changes will not be kept after a synchronization happens. A synchronization happens when the systems restarts or any settings are changed by the administrator.

Additionally, if the **First Name** and **Last Name** fields are greyed out, the system administrator has blocked the function that allows you to edit your first and last name.

4) Click Save.

# 7.2 How to Specify your Email Address

#### **Prerequisites**

The administrator of your communication system has configured the sending of emails.

### Step by Step

- 1) Click on Setup.
- Click on Personal Details > My Personal Details.
- 3) Enter your email address under Email.
- 4) Click Save.

### 7.6 Programming the Function Keys of the Telephone

You can customize the function keys of your telephone and any available key module or Busy Lamp Field (BLF) to suit your requirements via the UC client with a web application.

This applies to both the predefined function keys and the other function keys, but not the local application keys (**Local App.**). The user interface for key programming is opened in the same language as the UC client, if available; otherwise, in English.

**NOTICE:** The function keys of a SIP phone, an ISDN phone or an analog phone cannot be programmed with the UC Client.

In the case of phones with a display, you can also program some function keys directly at the phone.

### **Programming Function Keys on Different Levels**

You can program the function keys on two levels: the first level can be assigned all the offered functions, and the second level can be assigned external phone numbers. The Shift key must be configured on the phone in order to use the second level. The LED of the function key is always assigned to the first level.

# 7.6.1 How to Program the Function Keys of the Telephone

#### Step by Step

- 1) Click on Setup.
- 2) Click on My Preferences > Miscellaneous.
- 3) Click on **Start** under the **Phone Keys** area. A window for programming the function keys of the telephone is opened in the web browser.
  - a) If a message such as There is a problem with this website's security certificate. appears, click on Continue to this website.
- 4) Under the phone icon, Click on the key area that you want to edit.
- 5) In the detailed view of the key area, click on the key icon at end of the corresponding row. The key icon goes red and indicates that the function is active for programming.
  - a) If you want to display details on the current function of a key, move the mouse pointer over the label field to the left of the key.
- 6) Select the desired function from the Choose Function drop-down list.
  - a) If a function requires additional information (parameters), select these details or enter the required data.

**NOTICE:** Select the **Shift Key** function for a function key to access a second level where you program external phone numbers.

Click on Save.

- 8) If you selected a system phone with automatic key labeling, you can enter the text that should appear in the display of the function key in the Labeling column.
- 9) If you have programmed a function key as the **Shift Key**, select the check box **2. Level**. Enter the external phone numbers as described under steps 6 to 8.
- 10) If you want to program further function keys, repeat steps 4 through 9.
- 11) Close the web browser window for key programming.
- 12) Click Save in the Setup window.

#### Related tasks

### 7.7 How to Change the Password

**NOTICE:** For security reasons, you should change your password after logging in for the first time. Otherwise, unauthorized users could, for example, potentially access your voicemails and fax messages or redirect your station number to external toll-based destinations by simply using the default password.

**NOTICE:** You can also change the password via the Phone menu of the voicemail box.

### Step by Step

- 1) Click on Setup.
- 2) Click on Personal Details > My Personal Details.
- 3) Under Password, click on Change.
- 4) Enter your current password in the Old password field.
- Enter your new password in the New password and Confirm password fields.
  - a) a. The password must consist of only digits and include at least six digits.
  - **b)** b. The maximum number of repeated characters is two and the maximum number of sequential characters is three.
  - c) c. The account name (reversed or not) cannot be part of the password.
  - d) d. The user is forced to change the default password after the first use.
  - e) e. The maximum number of erroneous login attempts is five.

**NOTICE:** The password is valid for all UC Suite clients and for accessing the voicemail box via the telephone.

6) Click on OK, followed by Save.

#### Related tasks

# 7.8 How to Change the Login Name

### Step by Step

- 1) Click on Setup.
- 2) Click on Personal Details > My Personal Details.
- 3) Enter the desired user name in the Login Name field.

**NOTICE:** This selected **Login Name** applies to all UC Suite clients. If you want to interconnect **myPortal for desktop** with the **myPortal to go** and **myPortal @work** UC clients, you must enter your own internal number as **Login Name**.

4) Click on OK, followed by Save.

### 7.9 How to Enable or Disable an Automatic Login

**NOTICE:** You should use the automatic login only if you are certain that no-one else has access to your user account. Otherwise, unauthorized users could, for example, potentially access your voicemails and fax messages or redirect your station number to external toll-based destinations.

### Step by Step

- 1) Click on Setup.
- 2) Click on Sensitivity > Security and Access.
- 3) Select one of the following options:
  - If you want to enable the automatic login, select the check box
     Remember my password and automatically log me into myPortal.
  - If you want to disable the automatic login, clear the check box
     Remember my password and automatically log me into myPortal.
- 4) Click Save.

### 7.12 How to Enable or Disable Tabs

**NOTICE:** At least one of the tabs always remains active.

Step by Step

- 1) Click on .....
- 2) Select one of the following options:
  - If you want to display the Journal tab, click on the Show Call History
    option. The Check mark symbol will be appeared next to the Show Call
    History option and the Journal tab is now enabled.
    - If the **Check mark** symbol already exists next to the **Show Call History** option, then no action required
  - If you do not want to display the Journal tab, clear the Check mark symbol next to the Show Call History option. The Journal tab is now disabled.

If the **Check mark** symbol already does not exsts next to the **Show Call History** option, then no action required

- 3) Select one of the following options:
  - If you want to display the Voice Messages tab, click on the Show Voicemail option. The Check mark symbol will be appeared next to the Show Voicemail option and the Voice Messages tab is now enabled.
    - If the **Check mark** symbol already exists next to the **Show Voicemail** option, then no action required
  - If you do not want to display the Voice Messages tab, clear the Check mark symbol next to the Show Voicemail option. The Voice Messages tab is now disabled.

If the **Check mark** symbol already does not exists next to the **Show Voicemail** option, then no action required

- 4) Select one of the following options:
  - If you want to display the Fax Messages tab, click on the Show Faxes option. The Check mark symbol will be appeared next to the Show Faxes option and the Fax Messages tab is now enabled.
    - If the **Check mark** symbol already exists next to the **Show Faxes** option, then no action required
  - If you do not want to display the Fax Messages tab, clear the Check mark symbol next to the Show Faxes option. The Fax Messages tab is now disabled.

If the **Check mark** symbol already does not exists next to the **Show Faxes** option, then no action required

- 5) Select one of the following options:
  - If you want to display the Directories tab, click on the Show Directories
    option. The Check mark symbol will be appeared next to the Show
    Directories option and the Directories tab is now enabled.
    - If the **Check mark** symbol already exists next to the **Show Directories** option, then no action required
  - If you do not want to display the **Directories** tab, clear the **Check mark** symbol next to the **Show Directories** option. The **Directories** tab is now disabled.

If the **Check mark** symbol already doe not exists next to the **Show Directories** option, then no action required

### **Related concepts**

User Interface Elements on page 12

# 7.13 Split View of the Main Window

You can split the main window in sub-windows in order to see simultaneously one or more of the **Directories**, **Journal**, **Voice Messages** and **Fax Messages** tabs.

### Step by Step

1) Click on symbol.

A drop-down list with the available options appears.

- 2) Select one of the following options from the drop-down list:
  - a) If you select the Single View option from the drop-down list then only one of the Directories, Journal, Voice Messages and Fax Messages tabs will be presented in the main window.
  - b) If you select the 1 x 2 option from the drop-down list then two of the **Directories**, **Journal**, **Voice Messages** and **Fax Messages** tabs will be presented vertically in the main window.
  - c) If you select the 2 x 1 option from the drop-down list then two of the Directories, Journal, Voice Messages and Fax Messages tabs will be presented horizontally in the main window.
  - d) If you select the 2 x 2 option from the drop-down list then the Directories, Journal, Voice Messages and Fax Messages tabs will be presented in the main window.

# 7.14 Screen Pops

Screen pops (also called tray pops or pop-up windows) offer you convenient ways to respond to incoming calls or new voicemails with a single click, for example.

Screen pops appear in the lower right corner of the screen. There are different types of screen pops. Screen pops for calls and messages show phone number, name and image of the caller, if possible. The buttons in the screen pops change, depending on the situation. You can control functions in screen pops via the keyboard (TAB or arrow keys and Enter).

Screen pops can be minimized to a tray icon. As soon as more than three screen pops are opened for calls, they are automatically minimized and shown as icons on the task bar.

You can define the following settings for the screen pops:

- Open main window on incoming calls
- Open screen pop on inbound calls
- Open screen pop on outbound calls
- Close screen pop at the end of a call
- Open screen pop on new voicemail
- Open screen pop on new fax message
- · Open messages window on new voicemails
- Open messages window on new fax messages
- Open summary (overview) on starting the UC client

The screen pop can also be displayed in a new user interface. In this interface, the symbols described below are grouped differently and have a slightly different appearance.

The user interface includes also a field called **Forwarded from**:. This field is displayed in the screen pop when the inbound call is forwarded by another extension. In this way, you can see the original caller and the person who forwarded the call to you.

If multiple screen pops are open, they can be expanded and collapsed.

**NOTICE:** The Windows task bar on a Citrix server client should only be operated at 1 height unit so that pop-ups remain visible and easily accessible

### **Screen Pop on Inbound Calls**

The following functions are available:

Symbol	Function
•	Answer
5	Forwarding
_	Forwards the call to the voicemail box
×	Answer with message
	Email to the caller.
	Example: You cannot accept the call and want to notify the caller (e.g., will"call right back").
	The email recipient (To:) field is prefilled with the email address of the caller, provided the address could be determined from a contact. In addition, you can define a text that is automatically displayed as the email text via Setup > My Preferences > Miscellaneous > Answer with message.
~	Caller notice
	Email to a subscriber to forward the data of the caller to that subscriber.
	The email recipient (To:) field is not prefilled. The contact data of the caller is transferred to the email text.
<b>F</b>	Instant Messaging
	Message to the caller.
<u>C</u>	Schedule Callback
	Configure the date and time as well as an info text to call the caller again.

### **Screen Pop During the Call**

The following functions are available:

Symbol	Function
•	Hang Up
H	Transfer
	Transfers the call after the input of a number to be dialed or a name to be found.

Symbol	Function				
	Hold				
••	The communication partner is placed on hold so that you can consult with someone in the room or call some other subscriber. The caller on hold cannot hear your conversations.				
	Record (if enabled in the system)				
	Conferencing				
	The call can be expanded to an ad-hoc conference and further participants can be added.				
×	Answer with message				
	Email to the communication partner.				
	The email recipient (To:) field is prefilled with the email address of the communication partner, provided the address could be determined from a contact. In addition, you can define a text that is automatically displayed as the email text via Setup > My Preferences > Miscellaneous > Answer with message.				
~	Caller notice				
	Email to a subscriber to forward the data of the communication partner to that subscriber.				
	Example: You have picked up the call of a colleague and want to notify the colleague.				
	The email recipient (To:) field is not prefilled. The contact data of the communication partner is transferred to the email text.				
<b>F</b>	Instant Messaging				
	Message to the communication partner.				
<u>Q</u>	Schedule Callback				
	Configure the date and time as well as an info text to call the communication partner again.				
(Ca)	Start Collaboration				
	Starts the separate Web Collaboration product for access to features such as desktop and application sharing, file sharing, and video chat.				

# Configuration

Symbol		Function			
H	Q	Transfer / Search			
-	·	If a phone number is entered in the field in front of the arrow, clicking on the arrow will transfer the call to that phone number.			
		When the initial letters of a name are entered in the field in front of the arrow, the arrow changes to a magnifying glass. Clicking on the magnifying glass opens the Search, and the results for the entered letters are displayed.			

# **Screen Pops on Outbound Calls**

The following functions are available:

Symbol	Function			
•	Hang Up			
×	Answer with message			
ŕ	Email to the called party.			
	Example: You do not reach the called party and want to notify him or her by email about some relevant issue.			
	The email recipient (To:) field is prefilled with the email address of the called party, provided the address could be determined from a contact. In addition, you can define a text that is automatically displayed as the email text via Setup > My Preferences > Miscellaneous > Answer with message.			
~	Caller notice			
	Email to a subscriber to forward the data of the called party to that subscriber.			
	Example: You do not reach the called party and want to notify a colleague about this.			
	The email recipient (To:) field is not prefilled. The contact data of the called party is transferred to the email text.			
Ę	Instant Messaging			
	Message to the called party.			
<u>C</u>	Schedule Caliback			
ŕ	Configure the date and time as well as an info text to call the called party again.			

# **Screen Pop for New Voicemails**

The screen pop also displays the date and time the voicemail message was received. The following functions are available:

Symbol	Function				
y	Play Message Through Phone				
<b>&gt;</b>	Play Message Through Speakers				
II	Pause				
	Stop				
~	Email				
_	Email to a subscriber to forward the data of the voice message to that subscriber.				
	The email recipient (To:) field is not prefilled. The contact data of the called party is transferred to the email text.				
<b>7</b>	Instant Messaging				
	Message to the communication partner.				
«	Rewind				
<b>»</b>	Forward				

# Screen Pop for new Fax Message

The screen pop also displays the date and time the fax message was received. The following functions are available:

Symbol	Function
	View
×	Close

# Screen Pop after Sending a Fax Message

This screen pop shows the date and time as well as the number of successful or failed transmissions. This type of screen pop only appears if the UC client is open when sending fax messages. The following functions are available:

Symbol	Function
<b></b>	View
×	Close

## Screen Pop with Overview on Starting the UC Client

On starting the UC client, the screen pop displays an overview (summary) with the number of voice and fax messages received and the open calls. The following functions are available:

Symbol	Function			
ထ	Voicemails: number			
	Fax messages: number			
3	Open calls: number			

You can jump to the specific details by clicking on the respective symbols.

If your presence status is not Office, you will receive a corresponding message.

## **Screen Pop on Overdue Presence Status**

The screen pop is displayed if your presence status is not **Office**, and the scheduled time of your return has passed. If you close the screen pop, it will reappear after one hour if your presence status is still overdue. The following functions are available:

Symbol	Function
_	Change the presence status to <b>Office</b> .

# 7.14.7 How to Enable or Disable Screen Pops for Received Chat Messages

# Step by Step

- 1) Click on Setup.
- 2) Click on My Preferences > Notifications.
- 3) Select one of the following options:
  - If you want to enable screen pops on receiving chat messages, select the check box **Display tray pop when I receive a chat message**.

If selected, when you receive chat messages the **Instant Message** window pops up on your screen in case that the window is closed or in the background and you are not typing on the keyboard. Otherwise, a screen pop appears on the bottom right corner of the screen when you receive chat messages in any of the following conditions:

- The Instant Message window is minimized in the taskbar.
- There is no selected conversation in the Instant Message window.
- There is a selected conversation in the **Instant Message** window but the received chat message is from another conversation.
- You are typing on the keyboard but not in the Instant Message window.
- You log into myPortal for Desktop and there are received chat messages that are missed or unseen.
- If you want to disable screen pops on receiving chat messages, clear the check box **Display tray pop when I receive a chat message**.

If not selected, when you receive chat messages the **Instant Message** window pops up on your screen.

4) Click Save.

# 7.14.8 How to Enable or Disable Screen Pops on Changing the Presence Status

- 1) Click on Setup.
- 2) Click on My Preferences > Notifications.
- 3) Select one of the following options:
  - If you want to enable screen pops on changing the Presence status, select the check box **Display tray pop on change of presence**.
  - If you want to disable screen pops on changing the Presence status, clear the check box **Display tray pop on change of presence**.

4) Click Save.

# 7.14.9 How to Open a Missed Event Screen Pop by Using a Hot Key

You can use a hot key to reopen the overview of a missed event.

#### **Prerequisites**

The set up hot key opens the overview traypop only if there are notifications to be displayed, that is, at least 1 voicemail message or 1 fax message or 1 open call.

## Step by Step

- 1) Click on the Setup symbol.
- 2) Click on My Preferences > Hot Keys.
- 3) Enter the desired hot key in the **Display Overview Traypop** field, and then select the **Hot Key Enable** check box next to it.

The hot key CTRL+L is preselected by default. If you want to use a different hotkey you will have to press the modifiers and the hot key, e.g. SHIFT+F1.

4) Click on Save.

When you press the hot key, the overview traypop is displayed.

# 7.14.10 How to Enable or Disable the Opening of the Messages Window for New Voicemails

#### Step by Step

- 1) Click on Setup.
- 2) Click on My Preferences > Notifications.
- 3) Select one of the following options:
  - If you want to enable the opening of the messages window on receiving a new voicemail, select the check box Screenpop the messages window when I receive a new voicemail message.
  - If you want to disable the opening of the messages window on receiving a new voicemail, clear the check box Screenpop the messages window when I receive a new voicemail message.
- 4) Click Save.

# 7.14.12 How to Enable or Disable the Screen Pop with an Overview on Starting myPortal for Desktop

Follow these steps to enable or disable the screen pop that appears on starting myPortal for Desktop with an overview of the relevant number of new voicemails, new fax messages, open calls, and possible indication of any absence.

## Step by Step

- 1) Click on Setup.
- 2) Click on My Preferences > Notifications.
- 3) Select one of the following options:
  - If you want to enable the screen pop that appears with an overview on starting myPortal for Desktop, select the check box Display the 'Overview' when the application starts up.
  - If you want to disable the screen pop that appears with an overview on starting myPortal for Desktop, clear the check box Display the 'Overview' when the application starts up.
- 4) Click Save.

# 7.15 How to Restore the Display

To restore the default appearance of the user interface, proceed as follows: All tabs in the main window will then be enabled.

- 1) Click on Setup.
- 2) Click on My Preferences > Appearance.

#### Configuration

How to Activate or Deactivate a Hotkey

- 3) Click on Reset Layout.
- 4) Click Save.

#### Related concepts

User Interface Elements on page 12

# 7.16 How to Activate or Deactivate a Hotkey

# **Prerequisites**

You are working under Windows.

## Step by Step

- 1) Click on Setup.
- 2) Click on My Preferences > Hot Keys.
- 3) Select one of the following options:
  - If you want to activate a hotkey, click in the rectangular field next to the relevant function and hold down one or more of the Shift, Ctrl and Alt keys while pressing the additional key desired for the key combination. If the pressed key or key combination can be used for myPortal for Outlook, this is displayed. Then select the **Hot Key Enabled** check box next to it.
  - If you want to disable a hotkey, clear the Hot Key Enabled check box next to that key.
- Click Save.

NOTICE: Configured hotkeys must be unique and function globally across all applications, such as myPortal for Desktop, myPortal for Outlook, and myAgent. The first application to claim the hotkey will retain exclusive access; any subsequent applications attempting to use the same configured hotkey will fail to bind it. To prioritize a different application for the hotkey, restart all relevant applications, ensuring the preferred one starts first. Alternatively, close the conflicting application, reopen the setup, and click 'save' to refresh the hotkey services.

# 7.17 How to Change the Server Address

**NOTICE:** Do not change the server address unless you are instructed to do so by the administrator of your communication system. You cannot use myPortal for Desktop with an invalid server address.

- 1) Click on Setup.
- 2) Click on My Preferences > Miscellaneous.

- Enter the IP address or the name of the communication system or the UC server in the Server Address field.
- 4) Click Save.

# 7.18 How to Configure a Call Transfer

## Step by Step

- 1) Click on Setup.
- 2) Click on My Preferences > Miscellaneous.
- 3) Select one of the following options in the Transfer Method drop-down list:
  - If you want to transfer the call directly to a subscriber without first speaking to that subscriber, select **Blind Transfer**.
  - If you want to speak to the subscriber before transferring the call to that subscriber, select **Supervised Transfer**.
- 4) Click on Save.

# 7.19 How to Enable or Disable Dialing by Entering a Name

## Step by Step

- 1) Click on Setup.
- 2) Click on My Preferences > Miscellaneous.
- 3) Select one of the following options:
  - If you want to enable dialing by entering a name, select the Enable live search check box.
  - If you want to disable dialing by entering a name, clear the Enable live search check box.
- 4) Select one of the following options:
  - If you want the LDAP contacts to also be included in the live search when dialing by entering a name, select the Include LDAP contacts in live search check box.
  - If you do not want the LDAP contacts to be included in the live search when dialing by entering a name, clear the Include LDAP contacts in live search check box.
- 5) Click Save.

# 7.20 How to Allow others to See your Call Details

You can allow directory users to see information about your current active call, such as who you are talking to, whether it is an inbound or outbound call and the call duration. This option is disabled by default.

# **Prerequisites**

The option of enabling this feature is activated by your system administrator.

#### Configuration

Troubleshooting

## Step by Step

- 1) Click on the Setup symbol.
- 2) Click on Sensitivity > Security and Access.
- 3) Select the option Allow other users to see who I am talking to.
- 4) Click Save.

If you disable this option while on a call, the change will take effect after the call.

# 7.21 Troubleshooting

Help on known issues can be found under Troubleshooting.

# 7.21.1 How to Resolve the Problem: No Connection to the Communication System (Windows)

The Windows Firewall is enabled by default on installing Windows. The firewall prevents the connection of your application with the communication system. Contact your network administrator or the administrator of your communication system to have the following steps performed:

#### Step by Step

Add the application to the list of exceptions in the Windows Firewall settings in the Control Panel.

# 7.21.2 How to Resolve the Problem: Some other Application Starts Instead of myPortal

If the Nokia Application Suite is installed on your PC, for example, Java applications such as myPortal.jar will be erroneously associated automatically with that application.

## Step by Step

Select one of the following options:

- If you want to resolve the problem for myPortal for Desktop and all other .jar files, re-install Oracle Java or OpenJDK on the respective PC.
- If you want to resolve the problem for myPortal for Desktop only, correct the
  corresponding string under Target in the properties of your desktop shortcut
  for myPortal for Desktop with the correct path details for javaw.exe and
  myPortal.jar, e.g.: C:\WINDOWS\system32\javaw.exe -jar
  "C:\Documents and Settings\All Users\Application Data
  \myPortal\myPortal.jar"

# 8.2 Features of the UC Clients that can be used with SIP Telephones

The following features of the UC clients myAttendant, myPortal for Desktop and myPortal for Outlook can be used with SIP telephones.

The used SIP telephone must satisfy the following prerequisites:

- 3PCC as per RFC 3725 is supported.
- The "Call waiting" feature is supported.
- Do Not Disturb is disabled.

Alternatively, for subscribers with SIP phones, DND can be activated in the communication system.

**NOTICE:** The full functionality of the features depends on the SIP phone used and cannot be guaranteed.

A successful test of the following features was performed with OpenStage 15 S.

- · Connection-/call-oriented features:
  - Make Call
  - Redirect call
  - Resume call
  - Application-controlled conference
  - Hold
  - Toggle/Connect
  - Consultation
  - Disconnect
  - Transfer
- Phone-oriented features:
  - Do Not Disturb
  - Call forwarding
